

Special Products

When only custom will do

As the building industry continues to evolve, engineering and architectural design applications are utilizing more and more custom products to satisfy air distribution requirements. When standard products are inadequate, engineers and architects need an air distribution company that can deliver non-standard products for custom applications. They need a company with a reputation they can trust to provide high quality products, specifically engineered to meet their needs in a time sensitive manner.

Titus continues to lead the industry by providing solutions for all types of air distribution requirements. Our special products group engineers custom products to your exact specifications. No matter how diverse the application, you count on Titus to deliver.

Sample applications include:

- Architectural grilles (various designs)
- Heavy duty or oversized linear grilles
- Grilles in brass or all welded aluminum construction
- Oversize and special size grilles
- Grilles with special mounting styles, fasteners, hinges
- Special finishes

Materials include:

- Brass
- Bronze
- Aluminum
- Steel
- Stainless steel

Custom drawings and 3D model provided for each job
