SUPER #140 - #170 FILTERS

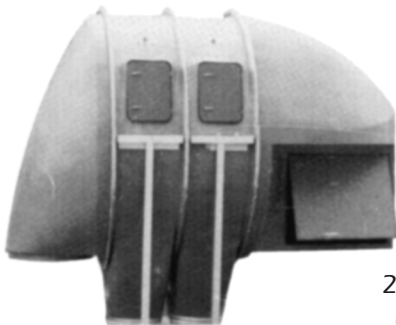

The Best Filter

Best Because. . .

- Perfect design.** Straight through airflow. Variety of inlets and outlets simplify piping. reduce backpressure.
- Perfect materials** "Black Fiberglass", aluminum and polyester all ideal for this service and maintenance free.
- Perfectly controlled.** Solid state reliability, fully field adjustable, safe, automatic.

The Best Filtration

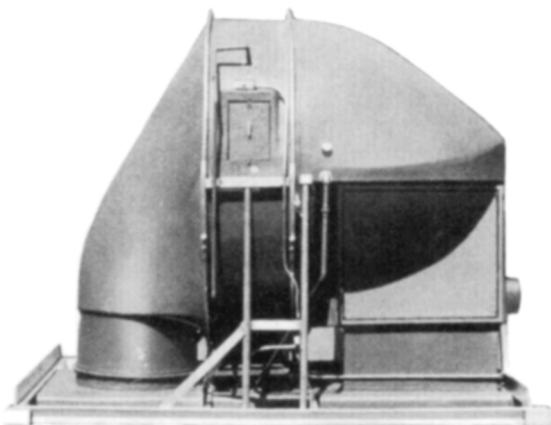

2 STAGE
FILTER

When the dryer exhaust must be especially clean.

- Ideal** for hotels and hospitals where indoor locations require long exhaust ducts and blowers which must be lint-free.
- Ideal** to prevent fouling air conditioner filters, intakes and condensers.
- Essential** if the dryer exhaust is to be passed through a heat exchanger or steam coil.

The Best Energy Saver

When you want to save.

- Today's ENERGENICS are the result of over 20 years experience saving energy on laundry dryers.
- Save Fuel.** Energenics' energy savers have for years consistently saved over 30% of a dryer's fuel cost. Tests by government agencies, private consultants and multi-plant users verify these savings.
 - Save make-up air.** Unlike direct recirculation systems built into some dryers, Energenics' energy savers supply all the air your dryer needs. Neither your plant nor your dryer will be starved for air...and you will have no make-up air heating cost.

Ideal Materials

Each Material used is the result of 20 years experience making the best, most maintenance-free and the safest filters for use on Textile dryers.

Energenics' "Black Fiberglass", a proprietary blend of glass, resins and special chemicals, is completely fire retardant, corrosion and weatherproof, lightweight and easily repaired.

It is slippery Lint will not adhere to its glazed surface like it does to metals.

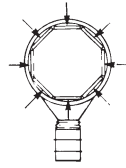

It is resilient The laminate has a flexural strength of 36,900 psi.

It is an insulator It transmits only 3% as much heat as steel.

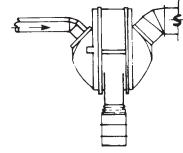

Energenics' welded aluminum frame requires no painting, no protection, no maintenance.

Energenics cable reinforced screens are made with a polyester monofilament which outlasts stainless steel. Many special screens available.

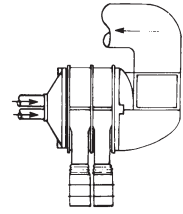

Makes It Easy For You!

Inlet and outlet rotate 360°

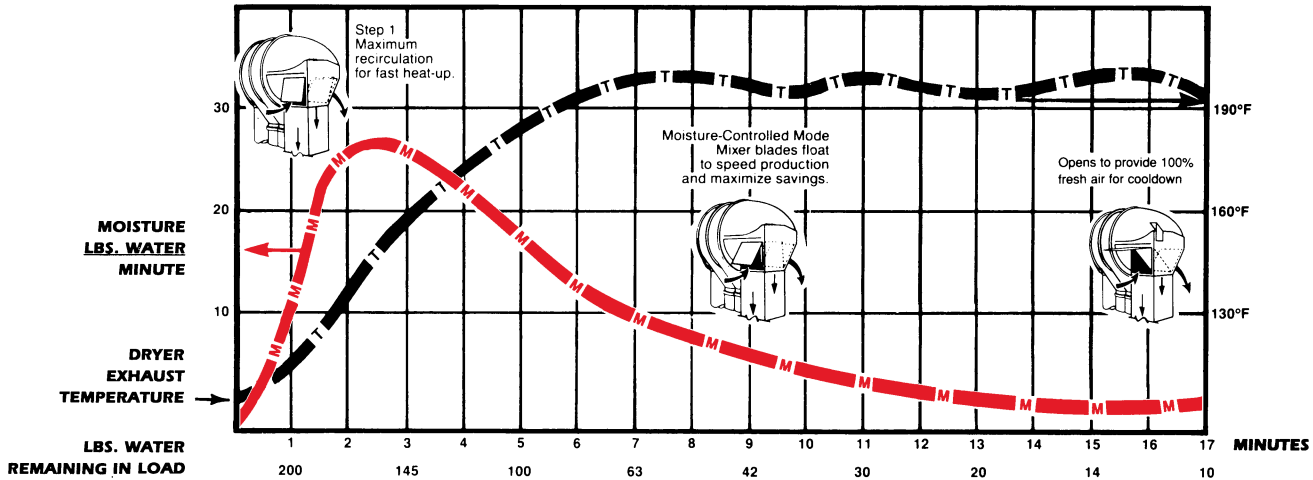

Special inlets and outlets.
