

# Video Projector Lifts and Mounts

Only DRAPER offers such diverse solutions to mounting your projector, plasma display or LCD panel display. Sophisticated, comprehensive and functional describe DRAPER's line of lifts and mounts. Seven different models of motorized video projector lifts are designed to help you mount the projector of your choice at or above the ceiling line. AERO MOUNTS enable ceiling installation of LCD/DLP projectors and wall or ceiling installation of plasma and LCD displays. All have built-in adjustability.

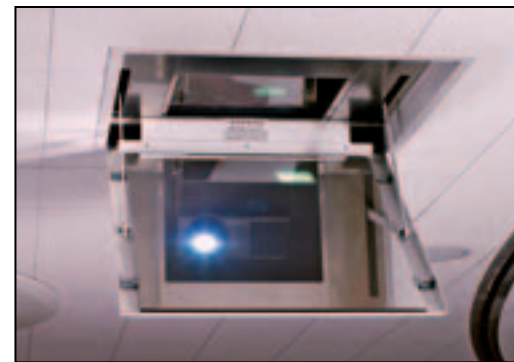

- **Revelation**—This unique projector mount permanently conceals the projector above the ceiling—and hides its noise as well. The REVELATION is compact, easy to install and accommodates a wide range of projectors.
- **Phantom**—The first of two new projector mounts. PHANTOM conceals the projector above the ceiling—and quickly dips into position when you are ready for a show.
- **Orbiter**—The second of two new projector mounts. The ORBITER rotates 180° bringing the projector into the room. Keeps projector very close to the ceiling.
- **Micro Projector Lift**—Designed to fit within a 2' x 2' ceiling grid. Lowers projector up to 4' with compact scissor mechanisms.
- **Scissor Lift**—The projector can be lowered as much as 17' from its stored position. Choose from 14 different models.
- **LCD Lift**—Compact projector lift with an attractive bomb bay door closure. Available in two sizes.

- Revelation
- Phantom
- Orbiter
- Micro Projector Lift
- Scissor Lift
- LCD Lift
- AeroLift 25, 50 & 150
- Aero Mounts for LCD/DLP Projectors
- Aero Mounts for Plasma Displays
- Aero Mounts for Flat Panel Displays
- VideoConferencing Camera Box

- **AeroLift 25, 50 & 150**—Three models to lift up to 25, 50 or 150 lbs. With a simplified design, AEROLIFTS install in even the tightest spots. Offers a different look than the mechanical one of scissor lifts.
- **Aero Universal Projector Bracket**—Solves the dilemma of choosing a projector bracket. Fits virtually any LCD/DLP projector.
- **Aero Mounts for LCD/DLP Projectors**—These ceiling mounts are sophisticated in appearance, functional in their abilities and installer-friendly.
- **Aero Accuset Projector Mounts**—Pipe-style, ceiling mounts are popular with installers. Adaptable to almost any field condition.
- **Aero Mounts for Plasma Displays**—Sleek mounts put plasma monitors exactly where you want them—ceiling or wall mounted, with plenty of stability and adjustability.
- **Aero Universal Plasma Bracket**—Fits a variety of plasma displays. Works in both portrait and landscape orientation
- **Aero Mounts for Flat Panel Displays**—Attractive mounts suspend LCD/TFT flat panel displays from ceiling or wall.

*Revelation projector mount and Access/Series E ceiling-recessed motorized projection screen in DTE Energy Executive Dining Room, Detroit, MI. Dealer: City Animation, Troy, MI. Architect: Ford & Earl Associates, Inc., Troy, MI. Photography by Wayne Williams, Indianapolis, IN. U.S.*

*Patent No. 6,379,012.*

- **Video Conferencing Camera Box**—Used to recess a video-conferencing camera in the wall. Available with a lock and key. Our new MCI MOTOR CONTROL Board provides complete flexibility in operating this equipment through a variety of input devices, including serial and network communication. Through the use of VIDEO INTERFACE CONTROL, you can link the operation of any DRAPER motorized lift to a DRAPER electric screen.
