iRDS in-rack iPod® docking station

The world's first and only in-rack iPod® docking station! Secure and easy to use with the simple "push/push" system you open the docking platform and dock the iPod®. When you're done, the easy release system allows you to take your iPod® with you. The integrated docking platform closes for that clean, sleek rack appearance.

The in-rack iPod® docking station is available as the single station (iRDS-1) or the dual station version (iRDS-2) for simultaneous use of two iPods®. Both stations occupy only one rack space. The in-rack iPod® docking station provides Firewire, and USB and audio outputs and is compatible with all iPod®, iPod mini® and iPod nano® products. The Raxxess in-rack iPod® docking station provides that seamless system integration you are looking for.

iPod® is a registered trademark of Apple Computer, Inc.
