## P150 Power Amplifier

[Print This Page](#)

### OVERVIEW

Like all Musical Fidelity power amps, the P150 embodies design principles which produce the open and natural sound quality for which we have become well known. Primary among these is the use of low feedback circuits which look simple in concept but are highly sophisticated.

The P150 sounds clear, consistent and controlled, with good detail and tonal differentiation. It is the perfect partner for the Preamp 3a and MC-2 or MC-4 loudspeakers.

### FEATURES & BENEFITS

### SPECIFICATIONS

**Power output per channel at 8 Ohms, <1%THD** 70 watts

---

**Sensitivity** 500mV

---
