Telephone Test Sets

The Model BS-100 is a rugged test set used by telephone technicians and installers. The Model BSM-200 is pocket size with all of the same features.

Features

- Mega ohm mW meter for testing insulation resistance and determining line conditions without help from the central office.
- High impedance monitor mode so not to disrupt conversation or data transfer.
- Other convenient functions include: Last number redial, hook and flash, speaker phone, mute, polarity check, battery check, touch tone, and pulse dialing.
- Model BSM-200 features ear microphone for hands-free operation.
- Made of high impact material for shock resistance.
- Tests cords uses piecing pin and Angled Bed of Nails (ABN) connectors.
- 9V battery included.

Model BSM-200

Carrying Case Included

TeleCom Data Tester

Model DCT-1

Model DCT-1 conveniently checks datacom and coax cables not yet installed, up to 1,500 feet. Both ends of cable must be plugged into the tester.

Protective Holster Included

Features

- Unique speech and light feature indicates condition of cable with one press of a button.
- Identifies open, shorted, and good cables before installation.
- Checks RJ-11 and RJ-45.
- 9V battery included.

Telephone Line Analyzer
