X-A200R Integrated Amplifier

[Print This Page](#)

OVERVIEW

The X-A200R is an upgrade on the award-winning X-A100R (What Hi-Fi five stars and Hi-Fi Choice RECOMMENDED). The X-A200R features increased output power for great dynamics and driving ability, plus full remote control with motorised volume and selector controls, and a lower price.

FEATURES & BENEFITS

Active preamp output included	Allows flexible use of the X-A200R in multi-room or surround sound situations. Also allows passive bi-amping.
Full remote control	Motorised volume and selector controls give convenience with the highest sound quality.
Structured internally as separate pre and power amps but packaged in an integrated chassis	Allows optimum design, free from intermodulation and other distortions that can occur when these circuits are combined, but with the advantage of perfect interconnection between them.
High power, high current output stage	Easily drives 'difficult' speaker loads and gives excellent bass control and weight.

SPECIFICATIONS

Power output 75 watts per channel into 8 Ohms

THD < 0.007% at 1kHz
< 0.04% 20Hz - 20kHz at 1W unweighted
< 0.008% 20Hz - 20kHz at 1W 'A' weighted

Frequency response 10Hz - 50kHz \pm 1dB

Inputs Six line

Input sensitivity 300mV

S/N ratio > -92dB unweighted
> -100dB 'A' weighted

Power consumption 400 watts (maximum)

Dimensions (mm) 230 x 110 x 345 (W x H x D)
Width and height include feet.

Standard accessories X-A100R power supply unit.
X-A200R remote handset.
