

**LPPS low profile power strip**

Raxxess Low Profile Power Strips are available in a variety of sizes, equipped with up to 12 Edison duplex receptacles. Each model is available with up to 3 circuits in 15A or 20A current ratings. Easily installed in the rear of our commercial enclosures, the space-saving design allows for ample clearance for mounted equipment and accessories. An integrated cable management channel runs the length of each strip, providing multiple tie-off points to keep AC cables segregated from signal and control cables. Factory installation is available at no charge when purchased with a commercial enclosure.

- features @ a glance**
- Twelve foot, 14-gauge AC cord (throw away the extension cords)
  - 8 unevenly spaced outlets (conveniently accepts wall warts)
  - Front mounted circuit breaker (no crawling around the back of the rack)
  - Spike and surge protection (brown outs don't matter)
  - 15 amp rating
  - RFI and EMI surge protection (on both sides of the power line)
  - 14-gauge cold rolled steel faceplate with durable powder coat finish

PD-800

PD-800VM

**PD-800, PD-800L, & PD-800VM rack mount power distribution**

The PD-800 power conditioners offer an attractive, high-quality and economical rack mount power distribution solution. Features include surge and spike protection, as well as EMI/RFI filtering for clean AC power. The PD-800L features pullout lights with an on/off switch and dimmer control. Both the PD-800L and the PD800 feature thoughtful outlet placement so you don't have to give up an outlet if you use a wall-wart. A front mounted 15A circuit breaker and a heavy-duty 12-foot AC cable are included for your convenience.

Now available with additional front outlet.
