

TB tie bars

Economical and efficient cable management. Sold individually or now in 10 piece value packs.

TBLO **NEW** 4" offset "L" shaped tie bar with multiple slots

TBA Thick aluminum tie bar for both vertical and horizontal cabling.

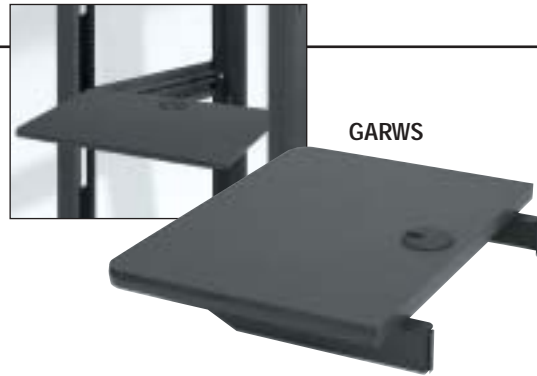

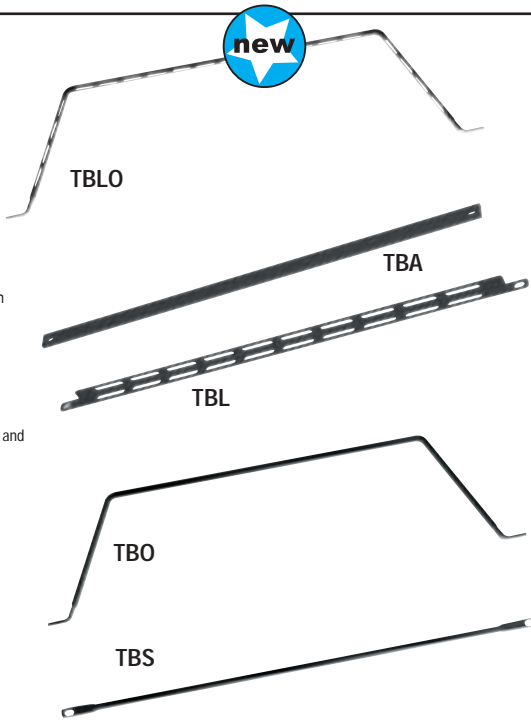

TBL "L" shaped tie bar with multiple slots for larger vertical or horizontal cabling

TBO 4" offset tie bar for rear cabling and stress relief.

TBS 1/4" round tie bars for small horizontal cabling

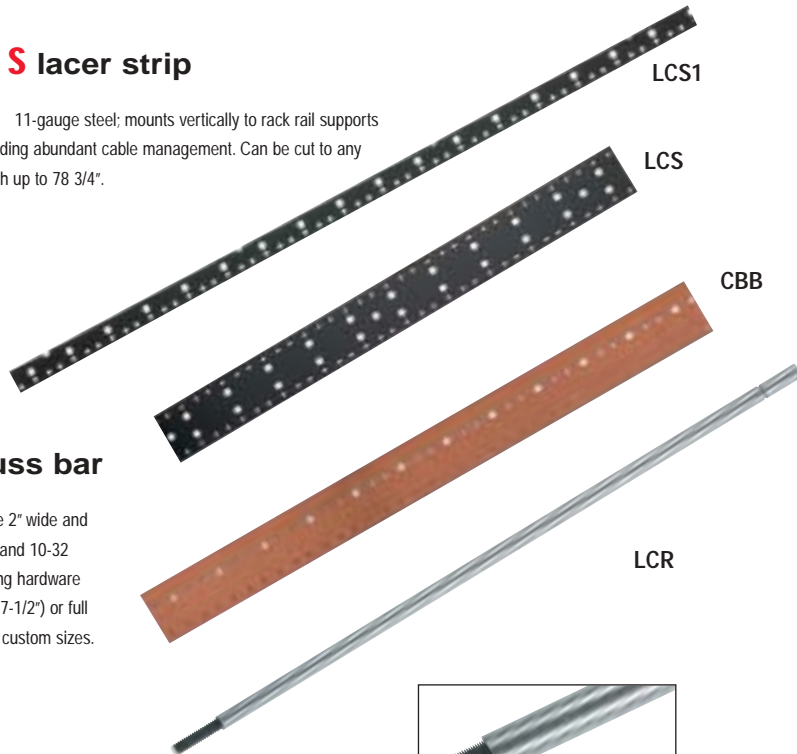

GARWS writing shelf

Available for 1,2 or 3-bay ganged GAR arrays. The GARWS writing shelf provides an attractive and stable work area. Constructed of 1-1/8" thick ebony fleck laminate with black T-mold edging, the 18" deep shelves are supported by steel brackets which connect to front rails of each rack. Cable passage grommets centered in front of each rack allow for clean wire management when used with keyboards, laptops or test equipment.

LCS lacer strip

11-gauge steel; mounts vertically to rack rail supports providing abundant cable management. Can be cut to any length up to 78 3/4".

GARCC cable chase

Our 4" wide cable chase provides additional cable management area for our 44U GAR racks. Available in both 26" and 32" depths, cable chases can be installed between ganged racks or will accept our GARSP side panels for enclosing a multi-rack bay.

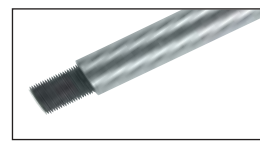

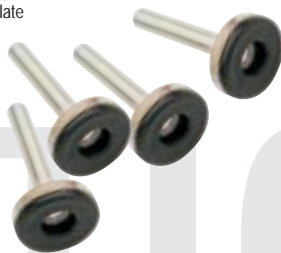

CBB copper buss bar

Solid copper buss bars are 2" wide and 1/8" thick. Includes non-threaded and 10-32 threaded mounting holes. Mounting hardware supplied. Available in 10 space (17-1/2") or full length 45 space (78-3/4"). Call for custom sizes.

Levelers

Set of 4 floor levelers, threaded posts fit all GAR and KAR racks. Adapter plate included.

LCR locking rod

SWR option for increased security. Available in 12 or 17".
