Russound®

Contractor Loudspeakers

Built for sound – priced for value

The new Contractor Loudspeakers work smarter and harder. They bring reliability and quality to affordable solutions.

Affordable solutions

The Contractor Loudspeakers make it possible to fill your home with sound, simply and affordably. Russound's newest and best response to making distributed audio accessible and enjoyable without giving up reliability or appearance. Quality, sound, value – Russound Contractor Loudspeakers.

Time tested

Proven technology and extensive field experience ensure that these loudspeakers will exceed your expectations. Drawing on the success of the well-known Russound model 523, this all new Contractor Series is coordinated in both appearance and functionality. The shapes, materials, appearance and sound quality work together in varied installation applications.

The all new SP-C823 round ceiling speaker with 8" poly-mica woofer and neodymium Mylar tweeter

All together

Most Contractor models share the benefits of pivoting neodymium tweeters for consistent sound and flexible mounting arrangements. Matching surround and cone material reinforce the goal of this family sound. Specially designed trim rings enhance fit and finish while improving sound dispersion characteristics.

A range of choices

Available either as in-wall or in-ceiling models, stereo pairs or single-point stereo units, one or several of the Contractor series loudspeakers will find a home... in every installation.

One of the best choices

In a world filled with decisions, Russound Contractor loudspeakers provide a clear choice.

The asymmetrical tweeter cavity with pivoting neodymium tweeter offers greater installation flexibility.

There's a place in your plans for Contractor Loudspeakers. Available new construction brackets make planning ahead easy.

Contractor looks great in the standard designer white, but it can also be painted to suit any décor.
