UNO-TS2
SMART TOUCHSCREEN
Double Gang Color Touchscreen for RNET Controllers

Features: High-resolution color LCD 3.75" diagonal touchscreen, 16-bit color, 320 x 240 pixels, IR pass-through, 110 punch-down for CAT-5 connection, hard keys for most commonly used functions, soft keys for all other selections. When controlling the newest Russound components like the SMS3 media server, ST2 line of smart tuners, and the a Dock, the touchscreen can display channel, artist, song title, genre, as well as custom names for preset banks and sources.
For IR controlled sources, control templates are built in, making programming minimal.

Benefits

Informative Real-time display shows what's playing, with volume level and individualized playlist information right on the touchscreen

Innovative Built on award-winning RNET technology offering complete control and limitless possibilities

Effortless Full featured, high-resolution color LCD 3.75" diagonal touchscreen is easy to read and simple to navigate

Practical Virtually no programming required and its compact, flush design fits neatly in a double-gang box.

*After the first UNO-TS2, each additional UNO-TS2 REQUIRES an SA-ZX3 keypad splitter.
