SMS3 Family of Smart Media Servers

A world of music at your command

With an SMS3 Smart Media Server you can make everyday sound better. Sort your music your way — by favorite song titles, artists, genre or themes. View and share your digital photos on any TV or PC. Simply choose your music, start a slideshow and relive the memories.

Since 1967, innovation, quality and reliability have been the core of the Russound product tradition. Today, Russound offers everything for enjoying multiroom audio-video in your home. All audio-video distributed solutions are built to high standards and designed with the unique consideration of making products that are a pleasure to live with and enjoy.

A world of music at your command

The SMS3 Smart Media Server is unique. It incorporates everything needed to enjoy your music collection, your way. Three music streams can play independent of each other, at the same time. The user-friendly interface helps you organize music by genre, artist, theme or occasion into personalized playlists. So you can choose what to play with one touch and listen anywhere your multiroom system reaches.

Thousands of hours of music

Available in two hard drive capacities — 160 GB and 250 GB. With the SMS3-250 you could listen to almost six months of music nonstop. It holds up to

4140 hours of music in its 250 GB hard drive. Giving you all the room you need for your current collection, plus room to grow.

Dean of Media

The Personal Media Assistant was named in recognition of the skill and spirit of one of Russound's most energetic dealers. The Dean of Media applies his knowledge and experience to personalizing your media server for you and your family.

By watching your listening habits, the Dean automatically remembers your favorites and offers them up at a single touch.

Photo ready

Like prints, digital photos can accumulate in your computer, in effect turning it into a digital shoebox. The SMS3 changes all that for the better: first, by giving you the ability to sort the images, and then by letting you look at them on a television. No more hovering around the computer monitor. Call up anything and share it easily and comfortably.

Yours, mine and ours

Because you can easily add music to your themes, everyone gets what they want. The SMS3 recognizes new additions, either from disc or the internet and stores them in the right place. For instance: you have defined a Jazz playlist with all of your CD's from that genre. Every new Jazz CD that you load will automatically be added to your Jazz playlist.

Thinking ahead to the beach

In the family room, Mom can work out to her music and watch vacation memories for inspiration

Imagine the roar of the engine

At the same time Mom's working out, Dad can rock on in the garage while making his sports car ready to roll

Meanwhile outdoors

The kids are their own story, in their own world and music is a big part of it. They can hear and you don't have to

Find your music again.

Your collection is in one place, sorted however you want – for example, artist, genre, theme or occasion – and available immediately via TV interface, keypad or remote.

Your pictures, too.

Group your photos by vacation, birthday party, or family occasions and look at them on your television. Choose your music, start your slide show and relive the memories.

Why choose Russound?

The Smart Media Server is a prime example of why Russound is a leader. Not only is the server technically advanced, but its unique user interface and the Dean of Media make it accessible and friendly to live with. Built to the highest standards for reliability and performance, the SMS3 Smart Media Server brings a whole new world to you.

The Russound SMS3 can make home everyone's favorite place to go.
