

RRussound®

iBridge Dock

Unleash your music

The complete solution for iPod RNET integration

iBridge Dock

Give your music room to play

Anywhere, anytime

Russound's iBridge Dock makes it possible to bring your music home again. Imagine walking in the door, docking your iPod® and your music is available anywhere and to everyone in your home. Just like a satellite tuner or media server, the iPod becomes a source for your multiroom audio system.

Instant Compatibility

iBridge technology works with Russound's revolutionary RNET® multiroom audio products. The iPod and Russound's components "talk" to each other. What you get is the ultimate user experience — instant access to all your music in an easy to use and entertaining system. The iBridge Dock includes an IR receiver, so no matter what system you own, your iPod can be operated by remote control*.

*Song title, artist and album names do not appear on keypads and touchscreens with an IR system.

Music to everyone's ears

From a keypad, touchscreen or remote control, simply select your iPod from the source menu and its ready to play through in-wall, in-ceiling or mounted speakers. So from room to room, you can listen to your digital music files without headphones – and so can everyone else.

Take off the headphones and unleash your music collection.

RRussound®

All about you

You have hundreds, maybe thousands of songs downloaded into your iPod. It took time and patience to get the right mix of artists, albums and songs. Why not share your music? Give it some room to play.

Life's music

iBridge gives you more of what you love in more places. Move from room to room enjoying the same music without missing a beat; or, different music in different rooms — something for everyone — it's your choice. With a Russound multiroom audio-video system, you can have it all — home entertainment for the way you live.

Ready when you are

Russound knows you want your iPod ready for your next adventure. The iBridge Dock conveniently keeps your iPod charged. Whether at home or on the go, we've got you covered.

UNO-TS2 Smart Color Touchscreen

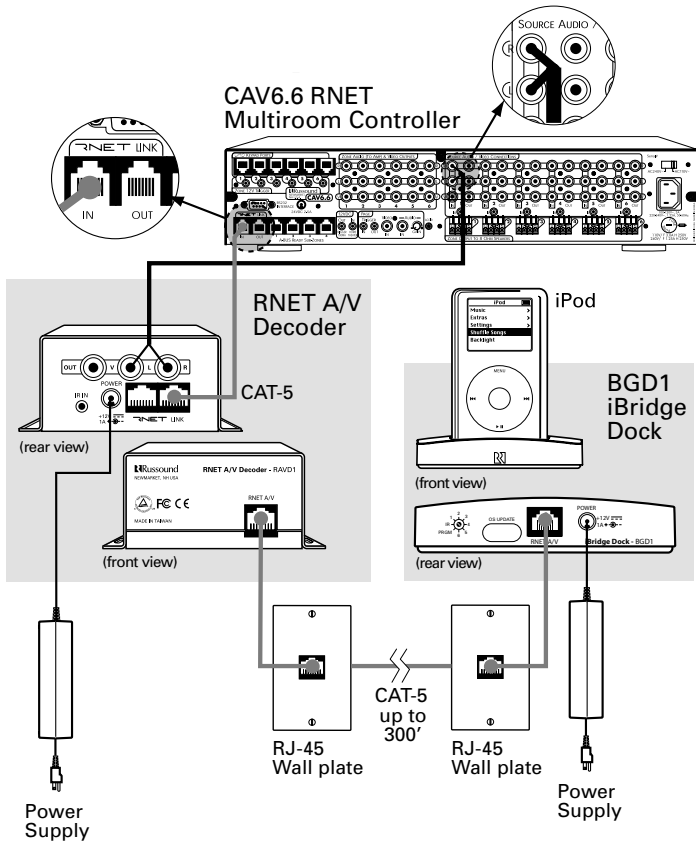

Perfect partnership

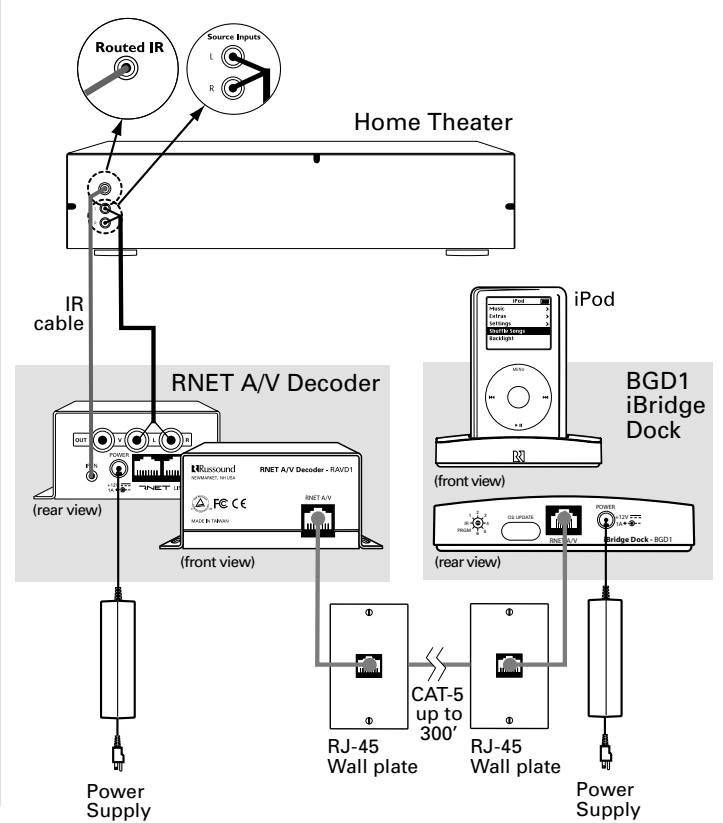

When entertaining friends and family or relaxing by the pool you have your favorite music at your fingertips. As part of a RNET multiroom system, the iBridge Dock is at its best. Russound's UNO-TS2 Smart Color Touchscreen lets you select music by artist, song title, album, playlist and genre – just like you do with your iPod. What's more, you get the song information (metadata) displayed on screen.
