

2-HOUR FIREPROOF SAFE

FIREPROOF INSULATION

Encased between interior and exterior body metal, composite fire protecting insulation protects contents in the event of a fire. Additional structural reinforcement ensures that contents stay secure, even if the floor or ceiling collapses.

ELECTRONIC LOCK

Allows quick and secure access to contents. Easy to change combination. Operates using 9 Vdc batteries, so no AC power is required.

FINISH

Graphite color over seamless body. Vinyl feet protect floor.

INTERIOR

Two adjustable shelves included.

RECORDS PROTECTION

This safe meets the rigorous standards of the UL® Class 350 2-Hour Record Protection Equipment Test for Fire and Impact. The UL test calls for the safe to be heated to 1638°F for 45 minutes. The safe is then dropped 30 feet onto rubble. After that it is turned upside down and heated again to 1638°F for another 45 minutes.
