

PRESSURE WASHERS

Hot Water Stationary

Electric-powered, Natural gas / LP heated

VNG: Industry's most rugged natural gas line with remote station capability

The VNG is the patriarch of the natural gas-heated pressure washers. Created in 1987, the VNG features a super-efficient vertical coil, burner assembly and remote station option—serving as the standard for natural gas pressure washers in the industry. The VNG also comes with an energy-efficient, burner and 24V electronic ignition for pilot-free operation. Its belt-drive, Landa Pump has cast-iron pulleys and dual-groove belts for a cooler operation.

Features	Standard	Optional	N/A
Time Delay Shutdown	●		
Electronic Ignition	●		
Wet Steam Combination	●		
Adjustable Thermostat	●		
Float Tank with Metering Valve	●		
Modulating Thermostat	●*		
Remote Operating Station		○	
LP Gas Conversion		○	

*6 & 8 gpm units only

Part No.	GPM	PSI	Pump RPM	HP	BTU	Voltage	Amps
VNG4-20024A	4.0	2200	930	6.2	400,000	230 1ph*	27
VNG4-30024A	3.9	3000	775	8.2	400,000	230 1ph*	36
VNG6-30024B**	6	3000	1525	15	600,000	230 3ph*	39
VNG8-30024B**	8	3000	1370	20	750,000	230 3ph*	52
VNG10-20024B	10	2000	1630	20	935,000	230 3ph*	46

*Models available in other electrical configurations.
**6 & 8 gpm units use a modulating thermostat for optimum heat efficiency and performance especially suited for multiple gun applications.

Available options: Auto start/stop, draft diverter, LP conversion, remote operating stations (up to 3 separate stations)

Electric-powered, Natural gas / LP heated

VHG: Economical, extra-compact natural gas- or LP-heated pressure washer

For a compact, economical natural gas model customers turn to the VHG, which has a footprint of only 24" wide and 53" long. The VHG 6-3 & 8-3 are 35" wide and 66" long. It, too, features a Schedule 80 Duracoil, a belt-drive, Landa Pump, and anti-siphon detergent metering.

**WIRELESS
REMOTE
OPERATION**

The innovative LanCom wireless remote system allows an operator to turn on and off the pump, burner and detergent from up to 300 feet away. The remote signal can even pass through walls giving the operator maximum flexibility for remote operation of any VHG model.
