

SMS Flatscreen WM 3D

A 3D arm that increases your screen's functionality and possibilities. WM 3D supports 30 kg.

How's your view? That is our main concern of our business. Different SMS-products holds and presents electronic pictures in stores, conference-rooms, airports, hotels, living rooms and kitchens all over the world.

We have a great experience of making it convenient for different kinds of equipment. That has made us keen on safety, engaged about design, and innovative when it comes to function.

This catalogue is a proof of that. It is filled with, inventions, equipment, brackets and stands of all kind, hidden projector lifts etc. Thanks to us there are few limitations for your display, projector or screen. If you still don't find what you are looking for in this binder, don't give up. If the idea you've got is a good one, we could help you implement it.

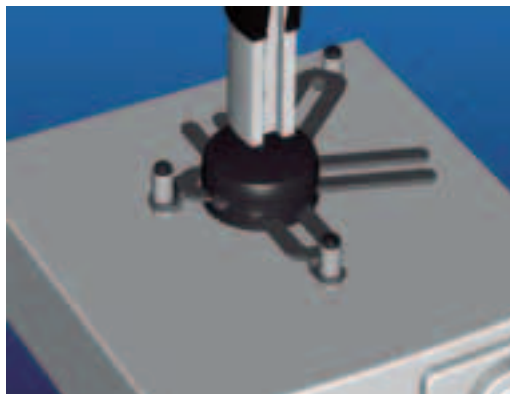

As a company, we are constantly learning and developing. Peoples desire of watching electronic pictures and have access to digital medias is increasing everyday and the technology is developing with that desire. Since we are inventing the products that are holding this technology, we must also be thinking and planning ahead. Regardless what the future will bring, a SMS bracket will probably hold it.

Best regards,
SMS – Smart Media Solutions

ADDITIONAL SERVICES BEYOND THE ORDINARY.

Are you looking for something that you can't find in our standard product range? If so, that's no problem, we can help you out. SMS

SMS is our finest product marking, focusing on design, safety, and functionality. Here you will find most solutions to most demands and a wide range of brackets and supports for projectors and screens. But this marking also host trademarks like the SMS Framesound™; our first-class sound system that is built into the frame of a big screen, (page 5:F1). SMS is making it comfortable, for both you and your technology.

FUNC

FUNC assortment is full of practical solutions. Catchwords are functionality and safety. Here you will find smart solutions, not extravagant ones. Func is a combination of strong materials in functional constructions. These products are not made to attract a lot of attention; they are made to put your screen in the centre of it.
