

The **UA-45 Offset Press** is the perfect machine for drycleaning hard to handle and specialty garments such as wedding gowns. It has an offset head and buck to facilitate the fast and easy lay-up of otherwise difficult to handle garments. It has an adjustable tray adjacent to the table to hold portions of large garments and it can be removed to simply place a hamper beneath the press. The **UA-45 Offset** is built on the rugged heavy duty **UA** frame and is available in either a left (**UA-45OL**) or right (**UA-45-OR**) configuration and with either a normal drycleaning spray steam press head or a polished hot head (**UA-45HHOL & UA-45HHOR**). The polished hot head is useful for the very highest quality finishing of linens and light colored silks.
