

Advanced 21st Century technology from a world leader in drycleaning equipment. We offer a most advanced and environmentally safe line of perchloroethylene machines and our **SmartTech EcoSystem 2010** is designed to meet and exceed OSHA, EPA, City of New York, New York State and California standards. It incorporates our exclusive **Eco** safe drying system designed with a high-efficiency solvent recovery and fast drying configuration that provides optimum perc recovery and minimum dry and cool down times. Our unique stainless to stainless round still design speeds distillation and eliminates troublesome plugs. Our **SmarTron 2000** microprocessor control gives full performance status at a glance, is easy to make adjustments and has manual override.
