

## **SC Series (Self Contained)**

The **SC Self Contained Series** of presses offers drycleaners a complete finishing station without the need for centralized steam or vacuum. Our **SC SERIES** is designed to save on valuable floor space. Rugged, durable construction ensures long life. Since we manufacture our own boiler line, the boilers for the **SC Series** are properly sized ensuring uninterrupted steam supply without water/condensation problems from the heads. The boiler can be sized to even supply other machines in the plant. A **¾ h.p. Vertical Vacuum** with tank provides the proper vacuum for easy lay-up and faster drying time. Choose from our **FX Series, BC Series** or our **UA Series** - all are offered as fully self contained presses with your choice of boiler size and the widest range of heads and bucks.

**FX - 42 SC Self  
Contained**
