

● UA Series

The **UA Series** is the same press frame used by our major high production, multi shift garment manufacturers. Very heavy duty frame construction and a cast iron "Y" (yoke) piece ensure many years of trouble free service. With the largest dual cylinder package in the industry, you will benefit with fast, reliable operation along with superior crease retention. Table mounted pressure control enables easy, accurate adjustment for fabric type. The **UA SERIES** will accommodate all types of heads and bucks.
