

VERSAFORM TSF-C

Tensioning Shirt Finisher with Cuff Clamps

A machine so versatile it just has to be called the **VERSAFORM**. This unit produces excellent quality on all types of laundered and drycleaned garments:

- SHIRTS 100% Cotton or Blends Size 14 - 20
- BLOUSES - Cotton, Ramie, Silk, Linen, Knits
- CASUAL WEAR - Pull Overs, T-Shirts, Knits
- And Much more

The **VERSAFORM** is a tensioning style shirt and garment finisher. It applies a flawless finish to shirts of all styles, shapes and cuts, including heavy starch. The body and sleeves are finished with steam injection and super heated air. The front placket of the shirt receives direct pressure from the front clamp that helps guarantee a superior finish.

The secret to its versatility is in its smooth mechanical action that applies tension to the front, laterally and across the shoulders of the garment. It has 9 fully programmable cycles making it simple to finish all types of garments. The **VERSAFORM** is effortless to dress and operate, making it easy to train even inexperienced personnel. It can be run in either manual or automatic mode.

The **VERSAFORM** is equipped with a microprocessor featuring self-diagnostics. Designed and built to exacting standards to provide years of trouble free service.

TUF

Tensioning Utility Finisher

The Tensioning Finisher Series from Unipress produces top quality garments and both are easy to operate. Both the utility form (model TUF) and the pants finisher (model TPF-P) feature manual or automatic cycles. Nine programmable cycles make it simple to process a wide variety of dry cleaned or wet cleaned garments. Each unit automatically applies the correct amount of tension prior to the start of the finishing cycle. Once the garment is positioned and is taut, the steam and hot air quickly finishes the garment.

The TF Series is designed to be easy to use, minimizing operator training. Even inexperienced personnel can be trained quickly to produce high quality garments.

Each unit is equipped with a microprocessor featuring self-diagnostics. The TF Series is built to exacting standards to provide years of trouble free service.

TPF-P

Tensioning Pants Finisher with Pleat Pads

The Tensioning Finisher Series from Unipress produces top quality garments and both are easy to operate. Both the utility form (model TUF) and the pants finisher (model TPF-P) feature manual or automatic cycles. Nine programmable cycles make it simple to process a wide variety of dry cleaned or wet cleaned garments. Each unit automatically applies the correct amount of tension prior to the start of the finishing cycle. Once the garment is positioned and is taut, the steam and hot air quickly finishes the garment.

The TF Series is designed to be easy to use, minimizing operator training. Even inexperienced personnel can be trained quickly to produce high quality garments.

Each unit is equipped with a microprocessor featuring self-diagnostics. The TF Series is built to exacting standards to provide

years of trouble free service.
