

FIBRE BODY OPTIONS

The options presented on these pages depict only a fraction of the equipment available for tailoring a Fibre Body to your needs. Contact your BRAND FX dealer for complete information.

Canopies

Obtain additional protected cargo and equipment space, as well as an enclosed working area, with a Fibre Body Canopy. Available for BFX 56, BFX 60, and BFX 84 applications, Canopies include an aluminum bulkhead and double rear doors with stainless steel hinges and a D-ring lock affording secure, three-point latching. Inside, there's room enough for a 6-footer to stand without stooping.

Roll Tops

Our fiberglass Roll Tops for regular Service Body and Canopy applications protect tools, equipment, and job materials from pilferage and inclement weather. Especially favored for utility and telecommunications vehicles, they feature heavy-duty slides, stainless steel hinges, and D-ring locks. Choose swing-out double rear doors or flip-up style with tailgate.

Tailgates

Convert the floor of a Fibre Body Service Body into a closed bed with an optional tailgate or tailboard (next page). Traditional tailgates with chain retainers are available in steel or aluminum, in 8-inch and 10-inch heights. Or choose an 8-inch aluminum paddle-latch or drop-in gate.

Tail Shelf

Increases length of bed floor for aerial applications. Available in smooth or treadplate aluminum or steel.

Bumpers

Our bumper options cover the bases. The selection includes "Sure Step" galvanized and steel treadplate bumpers, each available with a ball plate or pintle recess for trailer towing; aluminum step bumpers; pintle hooks, trailer plugs; and more.

Hotstick Doors & Shelves

In a Fibre Body, "a place for everything" applies equally to hotsticks. Hotstick doors and full-length shelves are available in a variety of sizes to meet a variety of storage needs. Doors include stainless hinges and lockable paddle latches. Shelves can be plywood lined or equipped with hotstick brackets or corrugated supports.

Ladder & Pipe Racks

Horizontal racks are available in your choice of materials (fiberglass, aluminum, or steel) and in flat or sloped orientation. Additional options include side-mount and bow style racks made of steel or aluminum, ladder clamps, and center hold-downs.

Transverses

Link the two forward storage compartments with a fiberglass transverse — a "tunnel" that crosses the body's floor to accommodate the longer items you need to carry. For maximum versatility and utility, transverses can be outfitted with shelves, drawers, dividers, and cages, in a multitude of arrangements.

Compartment Shelves

Adjustable fiberglass shelves — pultruded to ensure uniform thickness and strength — are only the beginning. Choose up to four shelves per compartment, with or without dividers. Pad the shelves with available rubber matting. Fixed shelves, meter shelves, and water cask shelves (with drains) round out the shelving options.

Pullout Drawers & Trays

Specify divided or non-divided pullout drawers to add cabinet-like convenience to one or more compartments. Available pullout tool trays are ideal for keeping small tools together and within easy reach.

Cabinets

How many drawers do you require? Our cabinet options offer anywhere from six to 18, to simplify segregating hand tools, parts, and pieces, for swift access at the work site.

Rod Lock System

This easy-to-use system lets you latch and lock all compartments on one side of the vehicle with a single lever at the rear of the body. It's fast and fool-proof.

Top Boxes & Baskets

Objects that won't fit into a side compartment or transverse, or that need a special place all to themselves, can usually be served by one of our many top box or basket options. The choices include vented fiberglass chainsaw boxes and rubber-goods boxes, featuring aluminum treadplate lids and rubber hasps; ladder, hotstick, and general-purpose boxes, with side doors and slam-type or D-ring locks; pre-punched aluminum baskets; and steel shovel baskets.

Versatile FlexGlo™ Rope Lighting

Our FlexGlo rope lighting casts light into every nook and cranny, even under shelves. It's available by compartment, with manual or door-activated switch operation. FlexGlo lighting kits are also available for retrofitting existing bodies or installing wherever supplemental lighting is needed — in the garage, office, or around the house.

Additional Options

Alarm, Back-up

Compartment Tops

- Aluminum Gripstrut
- Aluminum Treadplate
- Steel Gripstrut

Crane Reinforcement

Cup Dispenser

Door Locks

- D-Ring
- Electric
- Rotary Latch

Door Stops

- Detachable Cable
- Gas-Prop Retainer
- Over Center Door Holder
- Rubber Bumper

Floor Tie Down, Recessed

Gas Fill Cup, Aluminum

Gas Fill Guard

Grab Handles, Stainless Steel

Hitch Cover, Aluminum, Hinged

Holders

- Cone (Horizontal)
- Drill Bit
- First Aid Kit
- Sign, Aluminum
- Water Cask
- Wheel Chock, Bumper
- Wheel Chock, Fender

Hook Packages

- 1 Hook Assembly
- 2 Hook Assemblies
- 3 Hook Assemblies
- 4 Hook Assemblies
- 5 Hook Assemblies
- Material Rail & Hooks, 48-inch
- Material Rail & Hooks, 90-inch

Junction Box

Ladder Rack, Tilting Side Mount

Lighting

- Amber Beacon
- Back-up Lights, Extra Set
- Brake Lights, Extra Set

- Cargo Area Lights
- Compartment Dome Light
- Compartment Dome Light with Door Switch
- Flood Light
- Interior Light Guards
- Light Boxes, Aluminum Exterior
- Strobe Light
- Strobe Light Stand
- Master Switch

Nitrogen Rack

Pipe Vise Table

PVC Storage Tube with Aluminum End Caps

- 4-inch
- 6-inch

Spare Tire Mount

Steps

- Cable Stirrup
- Fold-up Stirrup

Tailboard

- Heavy-Duty Plastic, 6-inch, with Brackets
- Tailboard Brackets Only, Aluminum
- Tailboard Brackets Only, Steel

Tail Shelf Grab Rail

- Aluminum
- Steel

Tank Rack

- With Strap
- With Strap & 7-inch Ring

Transverse Drawer Dividers

- Egg-Crate
- Lengthwise

Undercoating, Automotive

Venting

- Door Vent, Square (with 4-inch round on inside)
- Floor Vent

Wall Liner, Aluminum

Wall Tie Downs

Wheel Well Liners

- Aluminum
- Galvanized Steel
- Stainless Steel
