

PowerBoss is a full line manufacturer of sweepers, scrubbers and combination sweeper/scrubbers for industrial applications.

The Power of Orange

Why Choose PowerBoss?

The Power of Clean

PowerBoss gives you The Power of Clean. Our state-of-the-art, full line of sweepers, scrubbers and combination sweeper/scrubbers will leave your industrial facility pristine and clean. With industrial grade equipment, now "clean" means so much more. Innovation and technology have allowed PowerBoss to create powerful and efficient equipment that bust through your toughest applications. Dirt, dust, debris and industrial by-products are no match for PowerBoss machines. Clean facilities offer a safer and healthier work environment. At PowerBoss, we strive to produce products for the market that meet or exceed customer expectations while continuously improving the process. Put our new line-up to the test!

New Product Line-up

PowerBoss' new product line-up offers a wide variety of products for your industrial facility. These tough machines are built to last and built to power through your cleaning needs. Eight series form a full line of sweepers, scrubbers and combination sweeper/scrubbers for industrial applications.

Collector Series

This walk-behind sweeper line is compact and perfect for smaller applications, but make no mistake, these durable workhorses are built for industrial environments.

Apex Series

These compact rider sweepers are a convenient solution to allow the operator to ride in comfort while covering large areas.

Armadillo Series

The premier class of rider sweepers, the Armadillo Series, covers large areas quickly and efficiently. These all-steel constructed sweepers are built-to-last for years of tough use.

Phoenix Series

Walk-behind scrubbers have never been so easy to operate. Our Phoenix Series scrubbers are tough on dirt, but easy on the operator.

Admiral Series

The Admiral Series offers the convenience and efficiency of a rider scrubber. They cover large areas while the operator is comfortably seated.

Monitor Series

This series powers through dirt and grime twice in one pass. The patented Monitor double scrubbers efficiently clean even the toughest industrial applications.

The Core

The Core is an innovative sweeper/scrubber fit for indoor or outdoor use. It is durable, maneuverable and designed for years of highly productive and dependable performance.

Commander Series

Unique all-steel construction is the first mark of durability on the Commander Series. These heavy-duty sweeper/scrubbers cover large areas and are available with many options for use in any environment.

PowerBoss is committed to the Blue Movement. We are striving to promote cleaner air and cleaner oceans by reducing pollution, ozone-depleting emissions, and promoting a healthier, safer work environment. All of our machines contain features that support the Blue efforts. To employ the Blue Movement throughout our line, we have broken down the features of each machine to sustain environmentally-friendly and operator-friendly operation. Our Blue seal verifies that each machine has been approved to match our Blue efforts.

- **Water Conservation** – Aqua-Stop saves water usage by 50%, water is released through a pump system providing greater control of water usage than gravity systems
- **Clean Air** - High-performance filter system dramatically reduces the release of dust and debris back into the air, dust vacuum ensures that dust is put directly into the hopper, bristle pattern on main broom increases dust control
- **Lower Emissions** – All gas and LP engines meet Tier 2 specifications, catalyst mufflers, battery operated available, diesel operated available, bio-diesel fuel can be used in all diesel products supplied by PowerBoss
- **Safer Work Environment** – Orange machines are highly visible to others in the workplace, simple controls reduce operator error, one-button scrub, horn, fire in hopper indicator, effective braking system, "belly bar" prevents operator from being pinned behind machine when in reverse, parabolic squeegee picks up all water leaving the scrub path virtually dry for traffic, seat equipped with safety shut-off switch, also available: overhead guard, back-up alarm, warning beacon
- **Clean Energy** – Battery operated walk-behind and rider units available in every product category, bio-diesel fuel can be used in Kubota engines
- **Lower Chemical Reliance** – Aqua-Stop saves chemical usage by 50%, pump system for water and chemical release allows for better control of chemical usage, chemical metering system is available as an option and regulates chemical usage to the correct dose

Features listed are general for PowerBoss equipment; each machine has different features and therefore, may or may not fill all

Aqua-Stop

Aqua-Stop is a great new feature on many PowerBoss scrubbers. In an effort to preserve chemical and water usage, Aqua-Stop is at the forefront of brush technology. A 50% savings of water and chemical can be expected as the system keeps them where they need to be, inside the brush deck. Water will not spin to the sides of the brush head as is typical on most scrubbers. Not only will you save on water and chemical, but the

EQUIPPED WITH AQUA-STOP

cleaning power is concentrated at the brush, providing for a pristine path the first time. Look for the Aqua-Stop symbol on the Phoenix 26, Admiral 30,32,36 and 42 and more to come.

Safety is in the Color

At PowerBoss, we put safety and quality first! Our new orange machine colors promote a safer work environment. Orange is a universal color to call awareness to safety and our machines are designed to be seen. In a busy industrial environment, a PowerBoss machine will be easy to detect. This will keep the operator, and others in the work environment, safer. The check mark will be on PowerBoss machines to ensure that each piece of equipment has been safety and quality checked. You receive a high-quality guarantee when you see the check mark on your machine.
