

# BASIC SPEAKER FOUNDATIONS™

Simple yet elegant, these speaker stands raise any speaker to the proper listening height

Basic Foundations™ may be affordable, but they're certainly not cheap.

The construction begins with **energy-absorbing MDF**, not particle board. Add

to that features like **ABS plastic spikes**, a **concealed wire path** and **neoprene**

**speaker isolation pads**, and you've got sound Foundations for your speakers.

Plus the **powder-coated black finish** blends seamlessly into most any setting.

BF24b | PFV47b

« Three height options allow speakers to be perfectly placed for a custom audio experience

« Neoprene speaker isolation pads provide a soft, non-slip surface

« Energy-absorbing MDF construction increases sound quality by providing acoustic isolation

« Sturdy ABS plastic push-in spikes provide a solid foundation on most any surface

« Patented concealed wire path hides even the largest cables from view

« Easy assembly can be completed in minutes with just a Phillips screwdriver
