3 Poindexter Systems Lobby, New York • Ira Frazin Architect • Featuring Palmwood Plank — Prefinished Natural FLIPK002

Bamboo Flooring

Architectural Systems, Inc. Bamboo Flooring, harvested from mature moso (giant) bamboo, is as hard as Maple, and 50% more stable than Red Oak. Bamboo is a rapidly renewable alternative flooring product at a very competitive price. Bamboo Strand Board flooring is engineered for the most demanding applications where an environmentally friendly material is desired, and has a hardness rating of 2600psi. Coordinating bamboo veneers and plywood panels available. Palmwood Flooring utilizes woods harvested from non-producing coconut palms, and features an exotic, striated grain.
