Product Description

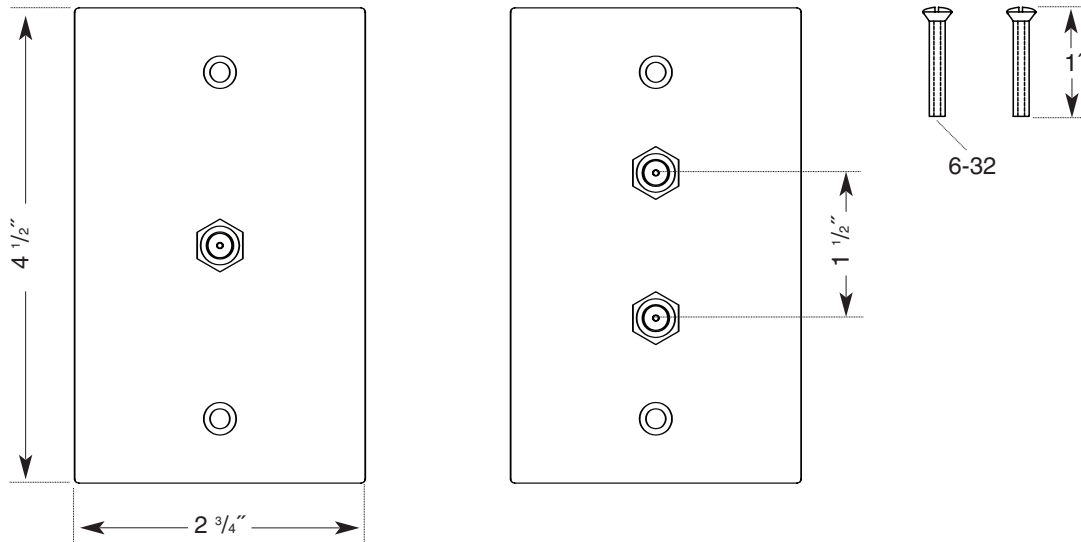

Steren's TV wall plates are designed for use with standard cable and satellite TV F-connections or other extremely low loss high-frequency broadband applications. Available with single or dual F81 splices, these superior quality wall plates are manufactured with smooth finish high-impact ABS plastic for durability, precision connections and performance. The precision machined F-couplers are constructed of nickel-plated brass with silver-plated phosphor bronze contacts. The wall plates come in almond, brown, ivory, white and light almond with matching color mounting screws to blend in perfectly with almost any location.
