- Supports VGA resolution up to 1024x768
- Supports NTSC and PAL video standards
- Includes VGA and video cables, USB cable, AAA batteries and user manual

203-270

## Product Description

When you need to transfer computer video to a larger screen for a wider audience, or to a more convenient location, Steren's PC-to-TV converter is one of the most cost-effective solutions available. It connects personal computers with standard VGA ports to TV sets with composite or S-Video jacks. This plug-and-play unit connects to a USB port; no additional software is required and no external power supply is needed. All PC-based multimedia can be displayed on a TV set, including professional slide presentations, Web sites, games, downloaded/DVD-ROM movies and other applications. The converter includes a full-function remote control for making image, video flickering and zoom adjustments. VGA, USB and video RCA cables are also included.
