Product Description

Steren's DVI-D male-to-male cables provide excellent digital connectivity between data projectors, plasma displays and digital TVs. These DVI-D cables support the highest video resolution possible and transfer of digital quality video. Our precision manufactured, fully molded cables feature copper conductors and gold-plated beryllium copper contacts. The ultimate in integrity and interference protection for these high-performance cable assemblies is ensured through individually shielded wire pairs with drain wire, a 100% Aluminum/Mylar foil shield and 100% copper foil shielded connectors.
