

The new LRTA recessed box allows a TV to be flush to the wall, so it hangs like a picture.

1. Cut a hole in the sheetrock between 16" center studs and set the LRTA inside.*
2. The finger-adjustable Quick Shims™ allow you to easily position and level the box and then secure it in place using provided hardware.
3. There are cutouts for signal and power cables on top and bottom, plus it's available in silver, black or paintable white to match any décor.
4. Once the LRTA is in place, choose a full-motion mount (model LRF118, VM400, or MF215) that fits your TV.

* Safety note: Before cutting, ensure electrical wires or piping does not run within desired location

Models VM400b and LRTA-S1 shown

« LRTA In-Wall Box supports Sanus VisionMount VM400 or LRF118 wall mounts

« In-Wall Box is available in a paintable white finish to match any décor

« VM400 features a hinged arm to support and extend flat-panel TVs up to 100 lbs. from 0" to 17" off wall

« Finger-adjustable Quick Shims™ allow box to be leveled and secured tightly into place in no time

« LRTA features signal and power cable cutout holes to conceal and organize wires

« LRF118 is specially engineered for the LRTA and holds flat-panel TVs up to 130 lbs.

BEFORE
Mount tucks neatly into in-wall box, enabling the TV to lie flush against the wall

AFTER
TV and mount pull away from in-wall box. Full-motion features readily available
