

Detex Newman Watchclock System

The Newman was the first portable watchclock of American design to be sold in this country. Built to a high standard of quality, ruggedly constructed, completely modernized and up-to-date, it is simple in operation and provides maximum service with minimum wear. The Newman also was the first portable watchclock to receive the labels of Underwriters' Laboratories, Inc. and Factory Mutual. It is approved by insurance companies worldwide.

EMBOSSED RECORD

The Newman record is made from type on the recording key by direct impression on the paper time-dial. Each key has raised numerals of an individual character - impractical for a guard to duplicate.

MOVEMENT

The exclusive Detex movement is designed especially for use in portable Detex Watchclocks. It is equipped with a cross-curved mainspring which assures a fairly uniform power supply with one wind over an eight-day period. The gear train features rugged, precision cut and burnished arbors, wheels and pinions running between hard clock brass plates having oil-cupped and reamed pivot holes. Acting as its governor, an 11-jeweled lever escapement with shock-mounted lower and upper balance holes and cap jewels in settings assure accurate timekeeping with the rugged durability necessary in a portable precision instrument. A deep drawn dust cover serves to enclose all of these working parts to keep out dirt and moisture.

DETECTOR

A tell-tale detector punches a hole in the paper record dial showing the exact time the case cover is opened or closed detects tampering.

INTERCHANGE- ABILITY

Where interchangeability is a consideration, Detex Newman Systems are provided with recording keys that will fit other Newman Systems. However, where special caution is required, Detex Newman Systems are available with keys made exclusively for that particular system - thus preventing collusion among guards in nearby areas.

CAPACITY

From one to forty strategic points within your buildings or property can be checked, each with a different record.

PROTECTIVE HOUSING

The precision mechanism is protected by a strong diecast aluminum case, light in weight. Case cover secured by lock. Entire clock is enclosed in a pouch of high grade harness leather, with riveted construction to give long wear. A metal grille protects a heat treated crystal and is designed to give a clear view of the clock face. The long shoulder strap facilitates carrying the clock in a protected position.

Detex Newman Watchclock System

PROVIDES EMBOSSED RECORD

The Newman is the only dial clock to provide an embossed record made directly from raised numerals on the recording key. It employs no ribbons, carbons or inking devices.

Each of the 24 hours of every day has a ruled space on the dial. Since the dial is synchronized with the clock mechanism, each time a station is registered, its embossed record follows the previous registration. Any omission by the guard shows up as a prominent white space on the dial.

DETECTOR MARKS

As on all Detex models, detector marks in the dial show the time the clock was opened or closed.

SIMPLE OPERATION

To extract the daily record, simply unsnap the locknut and remove the dial which shows instantly where your guard was through his tour of duty as well as when clock was opened and closed.

CONSTRUCTION

The Newman contains a highly accurate 8-day/shock resistant movement (especially designed for watchclock use) with an 11-jeweled escapement for dependable timekeeping. It requires but one winding a week. It is built ruggedly to withstand hard use. Its durable die-cast aluminum case is protected by a riveted, reinforced carrying pouch. A metal grille protects a heat treated crystal that is designed to give a clear view of the clock face. Capacity - 1 to 40 stations.

STATIONS

Recording keys are placed at strategic spots throughout the property, housed in metal stations. A selection of these stations is available from Detex. They vary from deluxe models - for use where a dignified appearance is desirable - to sturdy, utilitarian types. Lock covers are available.

DETEX SERVICE

Factory regional offices in New Braunfels, TX, New York, NY, and sales and service offices operated under our supervision by authorized distributors in major cities, assure Detex users prompt and convenient service everywhere. Emergency loan equipment is always available at service offices.

Don't risk the "human equation" during the most vulnerable time of the week - Friday night to Monday morning - and during all extended holiday and inventory shut-downs. When guards are supervised by the Newman, they resist the temptation to sleep, shirk or skip rounds. The danger of fire, burglary and vandalism is reduced significantly.

Find your nearest Detex office or distributor under "Watchmen's Clocks" in the Yellow Pages.

Detex Warranty

The Detex security watchclock product you have purchased is warranted to be free of defects in material and workmanship when properly installed, used and maintained according to instructions. We will, for a period of one (1) year from the date of purchase, repair or replace any part which, upon our examination, proves to be defective under normal use. This warranty will be honored only upon presentation of proof that the product covered thereby was purchased directly from an authorized Detex Distributor. WE SHALL NOT BE LIABLE FOR ANY DIRECT, INCIDENTAL OR CONSEQUENTIAL LOSS OR DAMAGE ARISING OUT OF THE FAILURE OF THIS DEVICE.
