

Detex Guardsman Watchclock System

The Guardsman provides unique, unbroken, mechanical supervision of your guards on weekends, during holidays and extended plant closings, as well as on week nights.

Unlike most other watchclocks, the Guardsman operates on a continuous roll of tape. This records your guard's activities for up to 120 hours, if need be, without changing the tape. Good practice forbids the guard from changing the tape himself. Insurance regulations prohibit it. Thus, a firm using a watchclock system of lesser recording capacity must have a supervisor return to the plant to change the recording dial every 24 hours. For this, the supervisor often must be paid at overtime rates. The Guardsman's extra capacity eliminates this problem.

The system is simple, reliable and inexpensive. It can be installed by one man using simple tools - a drill and a screwdriver. A watchclock system often actually pays for itself in a short time through reduced insurance premiums.

HOW THE GUARDSMAN SYSTEM KEEPS YOUR GUARD UP

The guard carrying the Guardsman visits a series of stations in a predetermined order. At each one, he inserts a recording key. This registers the station number on the paper time-tape in the clock. When a supervisor checks the tape, he can tell at a glance how faithfully the guard performed his duties. The record is unalterable, tamperproof, and alibi-proof. The supervisor can be sure that the guard inspected the areas assigned to him. And, as with all Detex Watchclocks, the guard appreciates that his reliability is a matter of undisputed record.

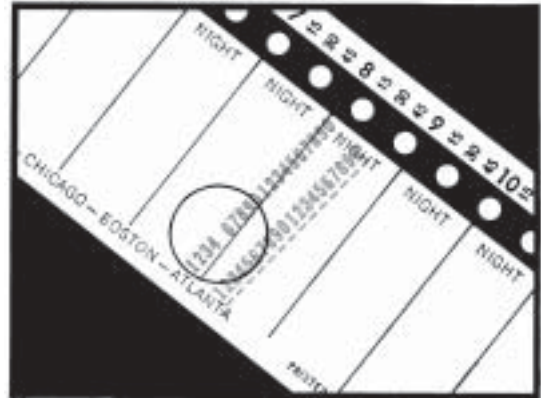

Detex Guardsman Watchclock System

PROVIDES EMBOSSED RECORD

The Guardsman is the only tape clock to provide an embossed record made directly from raised numerals on the recording key. It employs no ribbons, carbons or inking devices.

Each of the 24 hours of every day has a ruled space on the tape. Since the tape is synchronized with the clock mechanism, each time a station is registered, its embossed record follows the previous registration. Any omission by the guard shows up as a prominent white space on the tape.

DETECTOR MARKS

As on all Detex models, detector marks in the tape show the time the clock was opened or closed.

SIMPLE OPERATION

To extract the daily - or weekend - record, simply push the tape cutter. "Click" - you have in your hand a strip of tape which shows instantly where your guard was throughout his tour of duty.

CONSTRUCTION

The Guardsman contains a highly accurate 8-day/shock resistant movement (especially designed for watchclock use) with an 11-jeweled escapement for dependable timekeeping. It requires but one winding a week. It is built ruggedly to withstand hard use. Its durable die-cast aluminum case is protected by a riveted, reinforced carrying pouch which is equipped with a protective shutter covering the key house. The glass is heat-treated to prevent tarnish and discoloration. It resists breakage. Capacity - 1 to 40 stations.

STATIONS

Recording keys are placed at strategic spots throughout the property, housed in metal stations. A selection of these stations is available from Detex. They vary from deluxe models - for use where a dignified appearance is desirable - to sturdy, utilitarian types. Lock covers are available.

DETEX SERVICE

Factory regional offices in New Braunfels, TX, New York, NY, and sales and service offices operated under our supervision by authorized distributors in major cities, assure Detex users prompt and convenient service everywhere. Emergency loan equipment is always available at service offices.

Don't risk the "human equation" during the most vulnerable time of the week - Friday night to Monday morning - and during all extended holiday and inventory shut-downs. When guards are supervised by the Guardsman, they resist the temptation to sleep, shirk or skip rounds. The danger of fire, burglary and vandalism is reduced significantly.

Find your nearest Detex office or distributor under "Watchmen's Clocks" in the Yellow Pages.

Detex Warranty

The Detex security watchclock product you have purchased is warranted to be free of defects in material and workmanship when properly installed, used and maintained according to instructions. We will, for a period of one (1) year from the date of purchase, repair or replace any part which, upon our examination, proves to be defective under normal use. This warranty will be honored only upon presentation of proof that the product covered thereby was purchased directly from an authorized Detex Distributor. WE SHALL NOT BE LIABLE FOR ANY DIRECT, INCIDENTAL OR CONSEQUENTIAL LOSS OR DAMAGE ARISING OUT OF THE FAILURE OF THIS DEVICE.
