

# SUPER SPRAYFAST™ Adhesive Applying System

Our new, improved Super Sprayfast incorporates an acetal/teflon diaphragm pump circulating system and surge tank to provide quick, easy and even spray, with minimal overspray.

Item# 5150

Machine is complete as shown.  
(Adhesive not included.)

## Ease of Operation

Place the pump (factory mounted to the cover) on top of the adhesive container. Attach the air-line to the Super Sprayfast pump. The pump is self-priming and charges the spray gun quickly. A 15-foot hose gives the operator plenty of freedom of movement.

## Versatile

The Super Sprayfast is designed for use with 5 gallon pails or 55 gallon drums. The system is shipped with a drum or pail cover; depending upon which unit you order. Additional covers are available.

## Quick Clean-Up

Simply disconnect the air and depress the trigger switch to relieve fluid pressure. Submerge the spray gun and air cap in water. For extended clean-up, hook up the Super Sprayfast to a container of warm water and activate the trigger switch.

## Reliable

The acetal and teflon air operated diaphragm pump coupled with the circulating system keeps the adhesive fresh. The built in surge tank helps maintain an even spray. The spray gun is constructed of aluminum and stainless steel to resist corrosion.

## Safe

The Super Sprayfast has been designed for use with Duro Dyne's WIT, WSA and SSG water base adhesives. These adhesives are nonflammable and contain zero solvents. No venting is required.
