Two Convenient Panel Lengths

A full 2'6" longer than most competitive panels, the 12'6" panels help reduce seams and transitions on walls up to 12'6". For traditional-height walls, the extra panel length can be used under windows, on gables, or in other areas requiring shorter panels – or use the 10' length panel.

Wider Panels

With a 6-1/2" board and a 1-1/2" batten, CertainTeed Board & Batten siding is also the industry's widest, providing a realistic natural cedar look.

Color performance, impact resistance and durability are assured through our exclusive PermaColor™ System, a blend of our own Certavin™ resin, superior micro-ingredients and state-of-the-art pigment chemistry.

Sharp Batten Edge

The straight-edged design of the batten creates a finely crafted, real-wood look.

Flat Face, 6-1/2" Board

Certainteed's 6-1/2" board span is the industry's widest, and is designed to have a straight, even face with a flat surface for a true cedar board appearance.

Premium .048" Thickness

Board & Batten panels have a thickness of .048" for the ultimate in strength and durability.

Rough Cedar Finish

Certainteed was the first to utilize a direct transfer system from real cedar boards creating a natural woodgrain texture.
