# MONOLITHIC MEMBRANE 6125<sup>®</sup>

**RAISING THE GLOBAL STANDARD**

MANUFACTURING  
ENDURING QUALITY  
AND  
HIGH PERFORMANCE  
IN  
WATERPROOFING  
AND  
ROOFING SYSTEMS

# BENEFITS OF GLOBAL EXPOSURE

MM6125's international history is a thirty-five year tale of durable, seamless waterproofing in dozens of climates and numerous time zones.

From the parching heat of Saudi Arabia to the perpetual rain of Taiwan and the frigid air of Russia, MM6125 has logged millions of miles to provide premier waterproofing protection on over a half billion square feet.

And the very same standard of excellence that has driven our product performance also guides how we track international projects.

Which means that Hydrotech's technical skill and knowledge are available throughout the process – to architects, engineers, owners, consultants and contractors around the globe. Since our technical staff is also available at the start-up of each and every international job we do, our expertise is yours until the project is completed.

# MANUFACTURING PERFORMANCE

## Seamless Product

MM6125 has earned the BBA's highest rating, the BBA Agrément Approval from the United Kingdom as "an effective barrier to the transmission of water... for the design life of the roof structure." Agrément No. 90/2431 & 90/2432. And our ETA/CE mark is pending approval. It's protection that's built to last.

Le Casino de Montreal (Montreal)

## Seamless Design Process

From design through construction, Hydrotech's expertise is accessible to architects and contractors everywhere, whether near or far from the job site. With a worldwide network of sales representatives and approved applicators, guidance is within reach, wherever your address

might be. We even manage the time-consuming logistics of materials shipping and handling across the many borders and cultures. And our specification has been translated into several languages. Yet another set of tasks to cross off your list.

## Quality Formulation

MM6125 is a single component acid resistant membrane comprised of 100% solids. We take quality seriously, so the manufacturing process is subject to rigorous quality control. And it shows in our credentials – ISO9002 certificate on a worldwide basis.

## Reinforced Protection

MM6125 is applied in a fabric reinforced assembly – 5.5mm of time-tested waterproofing that performs optimally with or without slope, in saturated and dry conditions – over structural concrete, plywood and gypsum board. It's performance waterproofing for as many different conditions as climates and locations.

## Zero Slope Roofing

MM6125 is a Permanent Membrane Roofing solution with a thirty-five year history. And the membrane is monolithic – totally seamless. It's a comprehensive solution from an industry leader with the specialized expertise you seek.

## Environmentally Sound

The Environmental Grade (EV) performs just as effectively as our original MM6125 – the EV formulation just has 25% minimum recycled content. Both the original and EV grade are free of VOC's. A waterproofing membrane that helps to sustain the same world it covers.

## Cold Weather Applications

MM6125 can be installed in temperatures as low as -18°C (0°F). It's a membrane for the global climate.

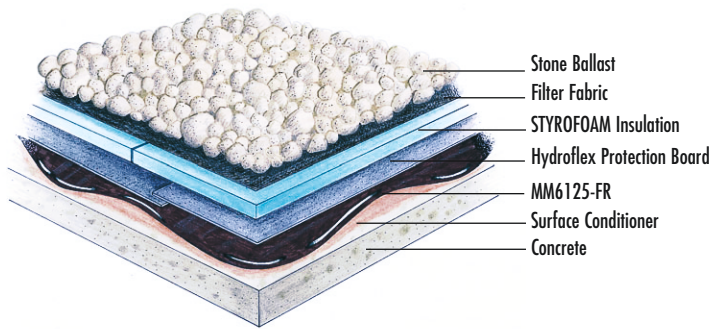

## Single-Source Warranty

Hydrotech provides assembly coverage direct to the owner for up to fifteen years. Single source. Simple solution.

Please contact Hydrotech for specific warranty terms and conditions.

# TYPICAL APPLICATIONS

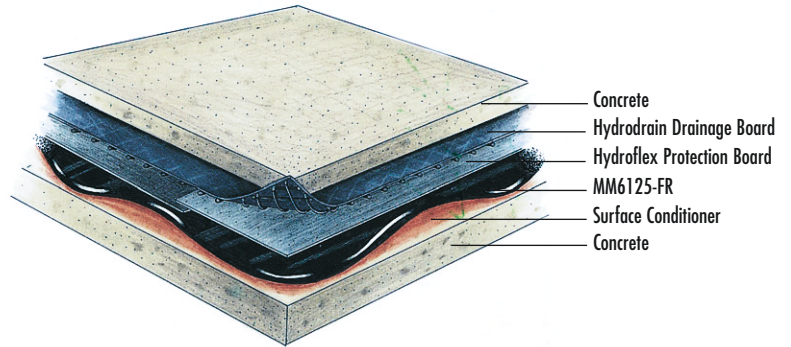

## Protected Membrane Roof

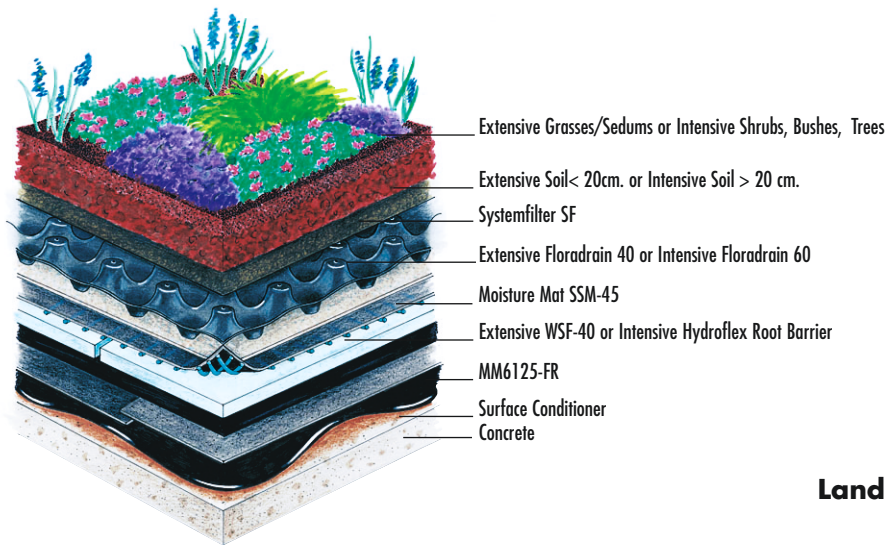

MM6125, manufactured with 100% solids and no solvents, is highly acid resistant and self-healing – a membrane that easily conforms to deck irregularities to form a tenacious bond to the substrate. The product's viscosity even gives it excellent crack bridging ability.

For additional Hydrotech ballasting options, including architectural pavers, please contact us.

## Split-Slab Construction

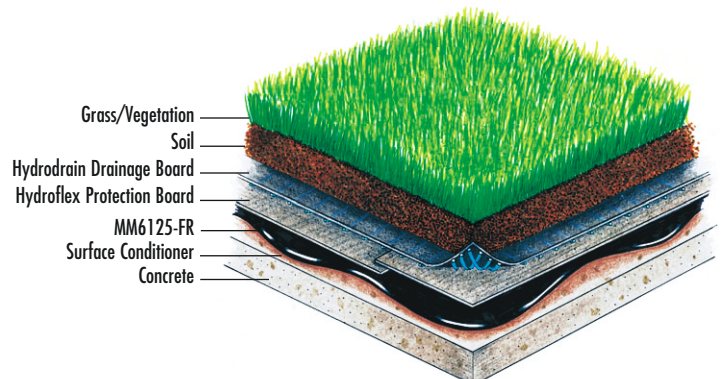

## Garden Roof Assembly (Extensive or Intensive)

The Garden Roof Assembly can be an Extensive system (grasses or sedums, with up to 20cm. of soil), or as an Intensive system (shrubs, trees, etc. with more than 20cm. of soil).

An attractive, sustainable solution that even helps improve a structure's efficiency.

## Landscaped Plaza & Planters

# GLOBAL EXPERIENCE

Hydrotech's waterproofing and roofing experience has been cultivated over decades, in twenty countries, with representatives and approves applicators around the globe.

Throughout this history, Hydrotech has refined the art of consistent, enduring performance – a characteristic that applies as much to our Monolithic Membrane 6125® waterproofing as to the way we handle international projects.

Seamlessly.

## International Project Locations

Algeria	Spain
Canada	Taiwan
China	United Arab Emirates
Costa Rica	United Kingdom
Cyprus	United States
Indonesia	

Iran	<b>Project Locations</b>
Ireland	<b>Pending</b>
Korea	Argentina
Mexico	Australia
Philippines	Croatia
Puerto Rico	France
Russia	Germany
Scotland	Hong Kong
Saudi Arabia	Jamaica
	Venezuela
