

Line of sight and a high profile are crucial to the effectiveness of police officers and security professionals everywhere. Whether working at a prison, a special event or security detail, peace officers need a tool that can move with requirements and provide a constant deterrent, even during off-duty hours. By providing a mobile command center with a suite of surveillance imagers and sensors, security officials can increase their effectiveness in ways never before possible.

The Sky Watch Sentinel provides the high profile deterrence and surveillance capabilities police officers and security professionals need. With a line of sight greater than that of a two-story roof-line, the Sentinel is a mobile surveillance tower that can be placed almost anywhere it is needed – from a prisoner working party to disaster response.

The Sentinel provides a greater vantage point than the Eagle with increased options for customization for specific applications. Due to greater vehicle flexibility, this unit has application in those arenas in which the Frontier may be excessive.

The Sentinel provides the perfect balance between security and force protection operations and the adaptability necessary to get the job done.

Optimize the functionality of your force, while maximizing your technology's utility.

The Sentinel platform facilitates a completely customized surveillance platform. This unit provides the additional line of sight and command and control capabilities necessary to high-level, impermanent security ventures. Compared to a mobile force, the Sentinel provides constant deterrence with nearly unlimited location flexibility.

The Sentinel is ideal for commercial and civilian security operations.

APPLICATIONS

- Crowd control
- Emergency response
- Long range surveillance
- VIP/Dignitary protection

ADVANTAGES

- Command and control capabilities
- Customizable sensor platform
- Raises above a second story roof line
- Deterrence by presence

SPECIFICATIONS

Height	deployed – 25' transport – 8' 11"
Width	deployed – 19' 7" transport – 8' 5"
Length	22'
Weight	8,850 - 9,000 lbs.
Tongue Weight	800 - 1,200 lbs.
Generator	5.5 KW diesel
Fuel Tank	100 gallons
Fuel Run Time	150 hours
Power	120 or 220 VAC
Set Up Time	less than 10 minutes
Towing Requirements	3/4 Ton Pickup
Hitch	2 5/16th Inch Tow Ball Class IV Rated (12,000 GVWR/1200 TW)
Axle	Tandem

FEATURES

- Heavier load capacity
- Single axle / dual wheel trailer (16 in. wheels)
- Eye level height over 25 ft.
- Generator or shore power options
- Flood light package (360° view)
