

BEHRINGER®

Supplying the fluid power industry for a combined period of over 75 years, Behringer has established an excellent reputation for their ability to provide affordable high quality products.

Designed to retrofit or replace many of the popular models offered by other filter manufacturers. Behringer products are consistent with the Behringer reputation and offer:

- Beta ratings of 100 or better
- High dirt holding capacity
- Optimum resistance to collapse
- Low pressure drop

Employing the most advanced filter media and assembly components available to provide excellent performance and resist premature failure. Various coatings and seal materials are available to ensure fluid compatibility. In addition, use of our products in conjunction with a conscientious maintenance program will provide maximum equipment service life, while insuring optimized productivity.

Behringer Inc. will insure interchangeability and comparable contaminate removal performance for many of the filters manufactured for air, fuel, lubrication, compressor, hydraulic and coolers:
