

BEHRINGER®

Injection Molding Interchange Elements

This month's product highlight will focus on filter elements that can be found at any injection molding plant. Every injection molding machine will have Dryers, Hoppers and Loaders. These locations have an accompanying Air Filter. Brand names include Conair, AEC, Whitlock, UnaDyn, MoldTec, Novatec and Premier. Most brands have part numbers for the filters. Other manufacturers do not, because it is difficult to label these types of filters. If you can identify some dimensions or an old sample, Behringer can supply the part.

A list of the manufacturers and the cross reference list is below.

A.E.C		
OEM	OEM #	Behringer #
A.E.C	12455	BE12455
