

BEHRINGER®

Mahle Return Line Filters for Mobile Applications

Features:

- Compact Design
- Bowl lengths to accommodate various flow rates
- Optional Built-in air breathers
- Optional fill ports
- Variety of connections available
- Available with highly efficient, high dirt holding "SMX" Elements
- Gauge, visual, electrical and electronic contamination indicators available

Benefits:

- Compact design is ideal for mobile applications
- Eliminates three components with a single filter; hydraulic filter, air breather, fill port.
- Allows for standardizing reservoir fabrication by using one filter head with different bowl lengths.
- Cleaner oil and better protection of critical hydraulic components by using Mahle's highly efficient "SMX" filter media.
- Fewer replacement elements by using High Dirt Holding "SMX" Elements.
- Air breather option is available in a "low-profile" design to further reduce the required space.
