

Process Controls

1435 Epos Electro Pneumatic Positioner

- Automatic initialization function
- Precise valve positioning
- NEMA4 rated epoxy coated housing
- Remote mounting configuration
- No air consumption in the control position
- Remote mount position feedback sensor insures against valve oscillation
- Designed for CleanStar® valves C60 sizes 1/2" to 1-1/4" connection
- Ideal for back pressure and flow control applications

1235 Electrical Position Indicator

- Microprocessor controlled
- Optical position indication (LED)
- Electrical position indication (Relay)
- Corrosion resistant plastic housing
- Protection class NEMA 4X
- Analog integrated travel measurement system (Stroke)
- Fully automated programming of switch points
- Designed for CleanStar® valves C60 sizes 1/2" to 1-1/4" connection
- Provides local and remote indication of valve position

CleanStar® + Epos® + Hydra-Line® = Synergistic Process Control
