TOLCO™ is a brand of **NIBCO®**

Supporting the Flow.™

 **TOLCO**™

TOLCO™ has built a reputation for high-quality products, and excellent customer service. TOLCO offers a complete line of pipe hangers, pipe supports, seismic bracing, channels and fittings for the fire protection, commercial construction and industrial process markets.

TOLCO continues the tradition of excellence begun by our parent company, NIBCO INC. During four generations of family leadership, NIBCO has grown from a brass foundry to twelve manufacturing centers, producing flow-control products available worldwide. Backed by nearly a century of experience in the flow control business, NIBCO's substantial investment in TOLCO demonstrates the company's commitment to products—
Supporting the Flow.™

At TOLCO™ we offer the highest quality and broadest range of pipe hangers in the industry. We are committed to innovative solutions that exceed industry standards including our seismic bracing system that is California OSHPD approved. An experienced technical support and customer service team is ready to service all your needs.

We not only stand behind our products—we stand under them.

Fire Protection

For over 30 years, TOLCO has improved the art and science of a properly designed pipe hanging seismic bracing system. All of our products are designed and developed in a living seismic laboratory. The harsh reality of manufacturing in an active earthquake prone area has consistently shown the reliability of our products even under these extreme conditions.

Mechanical

Many satisfied customers have described TOLCO as "supporting the industry like no other." Why? TOLCO supports the mechanical piping industry with its complete line of pipe hangers, TOL-Strut™ channel and seismic bracing. In addition, TOLCO has extended its product offering into value-added services including modified standard hangers, specialty metals and coatings. At TOLCO, we pride ourselves in delivering *Complete Support* to the market.

Industrial/Supports

With more than 30 years experience, TOLCO provides special fabricated pipe supports to the Mechanical/Industrial Piping Industry. Our total concept service package includes: Estimating support and a submittal package with mechanical/structural engineering and project management with a direct link to Construction Site. These services along with a complete line of pipe hangers, TOL-Strut™ channel and seismic bracing enable us to give customers *Complete Support* second to none.

Seismic Bracing

A leader in bracing technology, TOLCO provides the tools and OSHPD approved seismic bracing system to fit any application. We also offer a service package that includes a project manager, an experienced engineering staff, project estimate support and a skilled technical and customer service department. TOLCO provides complete seismic and dead load calculations complete with an engineer's stamp for any state in the union.
