## INTRODUCING THE PIPE PIER® CLASSIC

Pipe Support Systems for Roof and Raised Floor Applications

## The PIPE PIER® Classic

PIPE PIER® Classic support blocks are designed and engineered specifically for rooftop and raised floor applications. The innovative closed-cell polyethylene foam (UV resistant and practically weatherproof) along with a galvanized strut channel make this product an excellent choice in meeting your specific pipe and conduit support needs within a maximum 50 pound capacity. This series is offered in 4" and 6" heights.

### A-PIPE PIER® Classic 50H6

Stands at a height of 6" and is designed for installation of pipe and conduit with a maximum 50 pound capacity.

### B-PIPE PIER® Classic 50H4

Stands at a height of 4" and is designed for installation of pipe and conduit with a maximum 50 pound capacity.

### Components of PIPE PIER® Classic

- Closed-cell, medium density, black Polyethylene Foam Ethafoam HS 45\*
- 14 Gauge Galvanized Strut Channel
- Hot melt adhesive-bonding sheet metal to foam block BONDMASTER INSTAWELD 34-3378
