

# Moniteur

## 0-100% Digital Indicator

Moniteur's new digital indicator takes the guesswork out of determining exact valve position. The new indicator displays the position of quarter-turn valves in 0 - 100% with graduations of 10%. Features:

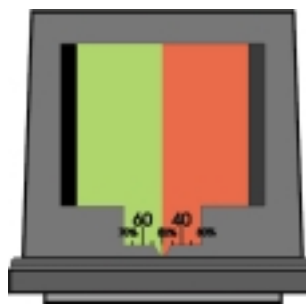

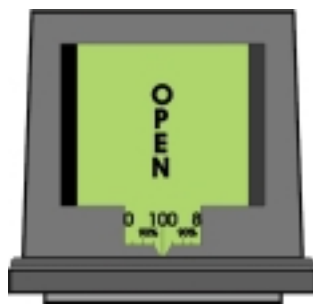

- Percent open is clearly shown with an indent in the middle of the display.
- Indicator is 100% adjustable and can be set to start at any point in the valve travel
- High intensity red and green used for indicator colors
- Environmentally sealed indicator on the top of the unit prevents fogging or entry of contaminants
- Clear cover is free from decals or paint that fade in sunlight or during plant washdowns
- 0 - 180° version available

The indicator can be supplied with the Sentinel, Watchman, Survivor and Indicateur series, and includes all of the benefits of the standard indicator that has made it the preferred choice of users.
