

Cabaret Screen

Its sleek and stylish contemporary design allows the Cabaret Screen to seamlessly blend into any environment

Cabaret Screen

The Cabaret screen is the first Stewart retractable screen created especially for the lifestyle customer. With a beautiful new housing, the Cabaret Screen offers an innovative approach to roll down screens. The Cabaret is perfect for multimedia room installations including conference rooms, boardrooms or lunchrooms. The stylish removable aluminum valance comes in a standard gloss black or architectural white but can be customized with the color of the client's choice. Customization can either be done onsite or at Stewart's factory. Its sleek and contemporary design makes it possible to install a front projection system into any size space, with any décor and even though it is exposed, it can seamlessly blend into any environment.

As well as being a beautiful addition to any multi-media environment, the Cabaret Series frame was constructed to make installation quick and easy. For instance, the standard sliding adjustable wall-mount bracket, built-in bubble level, and cable management system ensure an uncluttered appearance hiding power and home automation connections in a simple and installer friendly design. The ease and flexibility of installation extends to the motor unit as well, giving installers the option of using any motor they choose including Lutron QED, Quiet Somfy, and Legacy 120v quiet motors.

For rooms where both a flat panel TV and retractable front screen are desired, an optional mount allows the Cabaret Screen to be installed above a TV (or picture frame). The mount has a cantilevered design so that the screen is deployed without touching the flat panel TV. Mood lighting is also available in cobalt blue or white, which slightly illuminates the room for a more comfortable viewing experience.

The Cabaret screen is available in a variety of finishes including gloss black, architectural white, silver chrome, classic red, gray, forest green, metallic copper and brush nickel.

Standard Colors:

Gloss Black (High Gloss) Architectural White (High Gloss) Silver Chrome

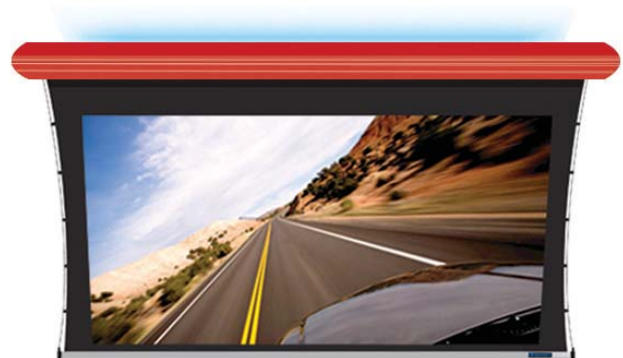

Optional Colors Include:

Forest Green (High Gloss) Brush Nickel (Gloss) Classic Red (High Gloss) Gray (High Gloss) Metallic Copper Brite Yellow (High Gloss) Custom Match Color & Material
