ULTRA THIN FLUORESCENT

This high output and low profile light will work for almost any application necessary; under cabinets where there is limited space, work areas, menu boards, and any tight space that needs bright light. The **Ultra Thin Fluorescent** *is packaged with a plug-in power cord, in line connector, 24" linkable connector and lamp rated for 8,000 hours of maintenance free use. This fixture is available in two lengths, 15-1/2" (8 watts) and 21-1/4" (16 watts).*

FEATURES
- High light output with low energy consumption
- Bright, energy efficient lighting from a smaller fixture
- Tri-phosphor coating provides 3100°K warm white light
- Electronic ballast provides instant "On" and eliminates flicker and hum
- Clear acrylic lens adds safety and protects lamps
- Touch switch with LED indicator provides convenient On/Off control
- Easy installation – link up to ten units in a single run
- Interconnect multiple fixtures with 2" inline connector or 24" jumper cable (included)

BILL OF MATERIALS

☐ Determine length(s) of area(s) to be lighted
☐ Select the appropriate number of fixtures to accommodate area

! Do not interconnect more than ten fixtures to one cord and plug. Ultra Thin Fluorescent lights are designed for plug-in installations only. The ALFLT4 series is not compatible with ALSLBOX for hardwire installations.
