# Hyd-A-Way®

Designed To Streamline Your Drop-Off Recycling Program

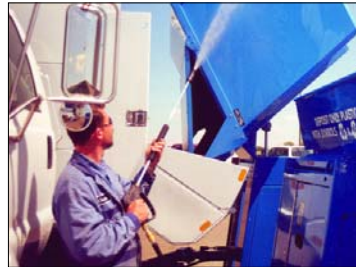

## High Profile Aesthetics & Visibility

**High profile** locations and 24/7 convenience ensure high participation rates.

**Custom openings** ensure the cleanest material streams.

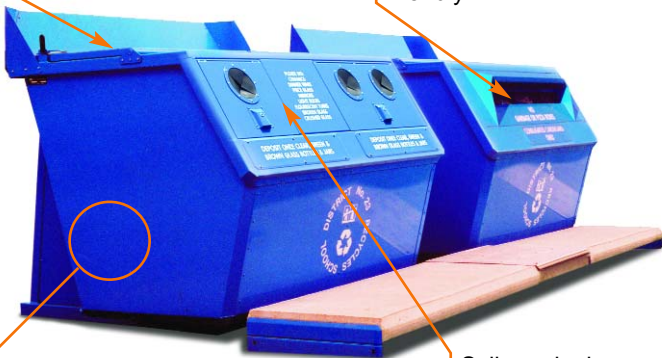

Onboard **pressure washer** keeps containers clean and odorless.

**Small footprint** makes efficient use of space at high profile locations.

Lid water seal keeps moisture out to maintain quality.

Material openings are low height and user friendly.

Galvanized steel panels and a Dupont powder paint finish ensures a long life and great program aesthetics.

Split or single containers up to 6 cu yds (4.5 cu m) allow multi-material collection.

## Clean & Efficient Collection

Unique “No-Touch-to-Dump”™ method maintains container aesthetics.

This semi-automated system enhances productivity and turns your program into a highly efficient, low cost operation.

Direct delivery routing streamlines collection logistics to reduce fuel, trucking and labor costs.

## Increased Recovery & Diversion

Hyd-A-Way® containers are strategically placed in high traffic areas such as shopping malls, grocery stores and public buildings and have proven to substantially increase participation and recovery rates.

The system’s modular design easily expands to accommodate changes in material streams, demographics and long-term growth.
