

SwitchBack™

Van Capability and Efficiency at a Fraction the Cost.

In a class above other inspection trailers, SwitchBack gives you a tiered diamond-plate cargo bench, rugged drawer cabinets, and a climate-controlled digital studio with your choice of rack-mounted control, display and recording equipment. A large picture window allows visual communication between operator and technician, ensuring fast, efficient inspection. Onboard generator options start at 4 kW, and an integral 15-gal washdown system keeps equipment clean and ready for the next job.

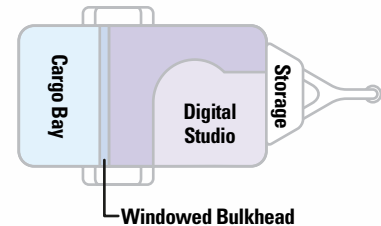

SwitchBack provides easy access to all your inspection equipment: crawlers systems, manhole cameras and push cameras, as well as basic digging and excavation tools. And because it's trailer-based, it literally switches from the back of one towing vehicle to another in minutes.

- Tiered, workbench-style tailgate with utility drawer presents equipment for quick, efficient set-up and operation.
- Climate-controlled digital studio positions video equipment and controls within easy reach.
- Unlike an inspection van, your trailer investment is not tied to the life of a single vehicle power train.
- Sizes start at 7' x 10'.

Digital Studio's Console, Cabinets & Floor Racks Ensure Easy Access to Video/Control Equipment.

Full Digital Video Support Enables Robust Video Analysis & Archiving.

Sliding Shelf Stows Crawler & Wheels.

Dual Flood Lamps Illuminate Dark Areas.

Wall-Hung Color Flat-Screen Monitor Displays Real-Time Inspection Footage.

15-Gallon Washdown System with Recoiling Spray Hose Simplifies Cleanup.

Shelf Holds Cable Reel at Standing Height.

Spacious, Two-Tiered Shelving Presents Equipment for Easy, Injury-Free Retrieval.

Heavy-Duty, Compartmentalized Drawers Hold 500 lb. of Accessories and Tools.

Insulated Cabinet Houses Your Choice of 4 kW or Larger Generator.
