

HyPak®

Rapid Cycle Side Loader

Combines Rapid
Cycle Loading and
DAC™ Technology
to Optimize
Productivity

•Storage •Collection •Transfer

HyPak[®]

Ideal for Medium-to-High Volumes in Curbside, Multi-Family & Park Applications

Flexible Collection

Seamlessly integrates with Hyd-A-Way[®] containers to achieve a highly efficient, low cost operation.

Using the lowest loading height in the industry for manual collection maximizes operator productivity and safety.

Double Action Compaction (DAC[™])

The packing blade compacts through the forward-and-return cycle to eliminate wasted strokes.

This innovative design maximizes bucket, hopper and body volume while minimizing cab-to-axle and turning radius.

Unique panel design facilitates material flow during the compaction cycle to achieve higher payloads.

Liquid & powder paint process achieves a high gloss yet durable finish.

Faster Loading

Service a Hyd-A-Way[®] container in under 3 minutes! Large bucket volume (up to 5 cu yds/ 3.8 cu m) minimizes loading time to optimize collection efficiency.

Options Include

Cart dumper adds flexibility without the high cost of full-automation.

Onboard 1,500 psi pressure washer keeps on-site equipment clean & sanitized.
