[PRINTABLE VERSION](#)

The Cherrington 800 Beach Cleaner is designed to work with compact tractors and is perfect for cleaning smaller public or private beaches, or any where sand cleaning is needed on a smaller scale. Remove sticks, stones, animal droppings, glass – and leave a beautiful screened beach!

The 800 Beach Cleaner has a cleaning width of 3', and performs best when pulled by a four wheel drive ATV or a 15 to 35 HP four wheel drive tractor.

Dual gauge wheels assure accurate and consistent cleaning depths. The Model 800 Beachcleaner's maximum cleaning depth is 3". The 800 comes with 2 separate screens for different sifting needs - 1/2" and 3/4" are standard, 3/8" and 1" screens are offered for special screening needs.

Two options for collecting and dumping debris!

The debris hopper on the Model 800 Beachcleaner has a capacity of 6.5 cu. ft. and empties through a manual open clams shell style door neatly onto the ground. An optional bagger system includes two heavy duty removable poly bags for convenient emptying into a receptacle of your choice.

For more information, take a look at our [brochures](#) or [video clips](#).
