

Safety & Reliability

Vetter History.

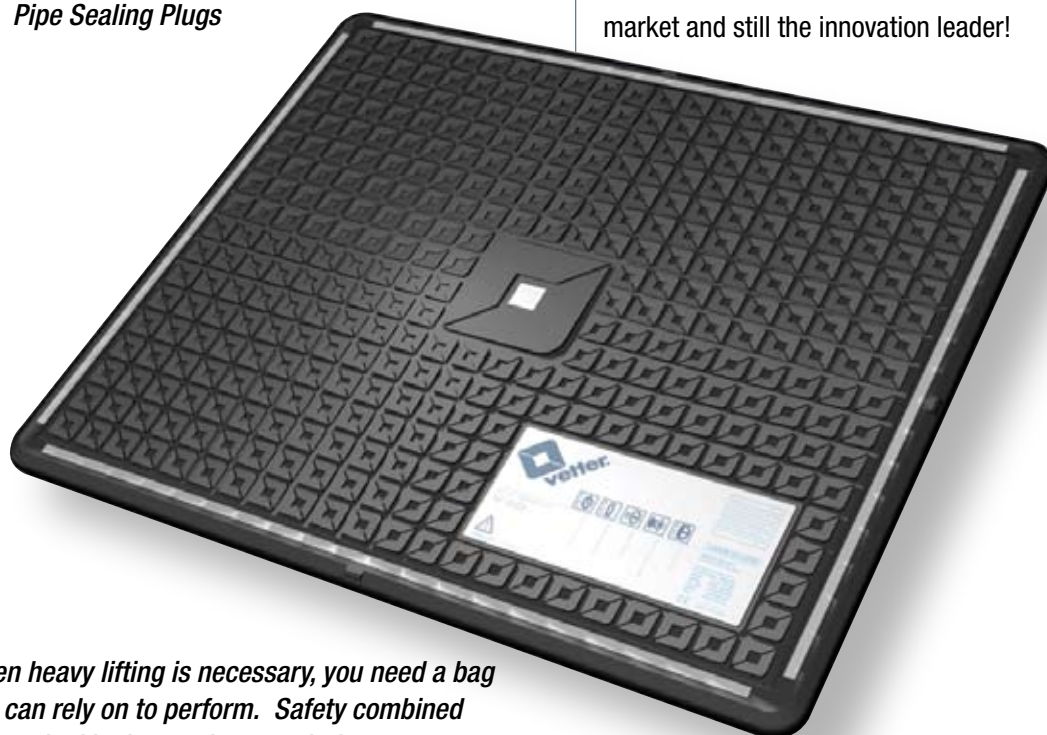

Vetter introduced low pressure air bags to the market in 1971, then high pressure air bags in 1974 — staking the claim as the world wide innovator in lifting bags. Vetter now manufactures a complete line of rubber products in the rescue and industrial markets including:

Pneumatic Decontamination Tents
Aircraft Lifting Bags
Rescue Paths
Hazmat Equipment
Leak Sealing Equipment
Pipe Sealing Plugs

Innovation Leader.

Vetter continues their innovation as the market leader. In 2007 Vetter introduced the Ultra Flat lifting bag. At one-half inch, it has the lowest insertion height of any lifting bag on the market. The Ultra Flat lifting bag is great for that initial lift needed to gain purchase points in tight scenarios. Ultra Flat bags are available in sizes from 1 ton to 10 tons.

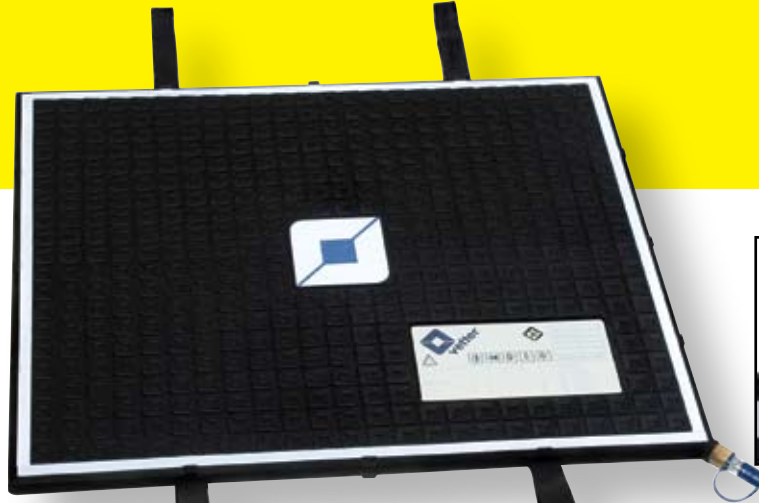

New in 2008, Vetter introduced a complete line of 145 PSI lifting bags that provide more lifting power with 25% less storage space. Vetter. First to the market and still the innovation leader!

When heavy lifting is necessary, you need a bag you can rely on to perform. Safety combined with reliability is the highest priority at Vetter — setting us apart from the rest.

- **Vetter lifting bags 100% factory tested**
- **Vetter burst pressure testing is unrestrained**
- **Vetter bags can be water tested beyond full pressure**
- **True 15 or 20 year life span**

Vetter Family of Products

Market Leader.

As a market leader, Vetter offers innovative products for a variety of related fields and applications.

Contact us for catalogs or information regarding the products below at: www.jawsoflife.com

or 1-800-537-2659

Pneumatic Tents & Showers

Vetter pneumatic Tents are manufactured from highest quality material developed by Vetter to be extremely durable and have the ability to sustain its shape for up to 48 hours in a variety of temperatures. Vetter tents are available in many configurations and can be completely assembled in less than three minutes.

Aircraft Lifting Bags

When it comes to airport operations time is most definitely money. Vetter offers a range of aircraft lifting bags designed to lift and support aircraft from small personal craft to the largest A380 flying today. Lifting planes without damage and clearing the runway quickly can be achieved with Vetter ALB's.

Hazmat

For containment of a leaking pipe, drum or large liquid spill storage, Vetter makes the quality product to do the job. All these products are manufactured from Vetter's specially designed rubber products to be durable and chemical resistant for all your Hazmat needs.

Pipe & Test Sealing Bags

Vetter offers a large range of pipe sealing bags. From minis to high pressure, for small applications to large city main water lines, Vetter offers the size, shape and durability your situation requires.
