Perfect for small resort and private beaches! The compact, wireless remote controlled, walk-along Model 950 Beach Cleaner is a self propelled sand cleaner with a 3' cleaning width. Zero turn radius and remote control operation makes this unit perfect for working in the tightest spaces. Private beach clubs, homes and resorts find this self contained Beachcleaner ideal for removing cigarette butts, rocks, animal droppings – and leaving the beach cleaned and conditioned.

Easy joystick steering with independent rear wheel drive provides great maneuverability in confined areas. The 950 can safely work within inches of walls, trees and cabanas. The 950 Sand Cleaner also works great on volleyball courts, ball fields, small resort beaches and even firing ranges. The wireless remote control lets the operator control the operation of the 950 from a distance through, around, and underneath beach and playground enhancements.

The front wheel mount is home for the hydraulic depth control cylinder, designed for easy depth adjustments of the 950. Convenient snap on spacers allow for accurate and consistent depth settings, up to maximum cleaning depth of 3 inches.

Screen your beach with the standard size screens, 1/2" and 3/4", or with the special optional 3/8" or 1" screens for a beach you will be proud of!

The debris hopper has a capacity of 6.5 cu. ft. and empties through a manually controlled open clamshell style door onto the ground. An optional bagger system is also available, which includes easy pull out bag mounts and 2 debris collection bags. These heavy duty, reusable bags are

removable for emptying into garbage cans or other suitable waste receptacles.

For more information, take a look at our [brochures](#) or [video clips](#).

Screen out shells, glass, cigarette butts and more!

Convenient dual bagger system available!
